

The Benefits of Being a Supplier on FoodLogiQ Connect

FoodLogiQ Connect is the most comprehensive, data-driven software solution enabling supplier management, food safety compliance, quality incident management, recall management and whole chain traceability – **all on a single platform built exclusively for the food industry**. The platform's intuitive functionality, guided workflows, document management and labeling capabilities, and ongoing training and support were built with supplier ease of use and continual compliance in mind.

Dynamic Action Items:

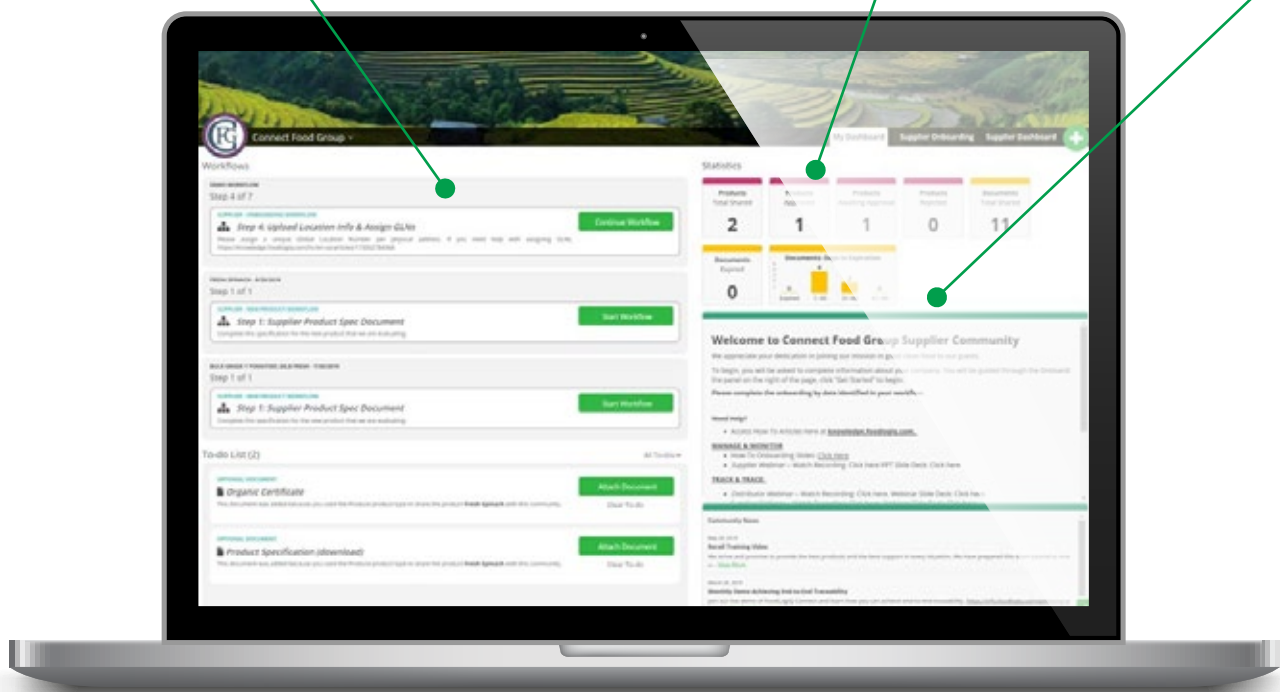

View all of the necessary documentation and assessments to **maintain compliance** on the Supplier Dashboard, and take action through the To-Do List.

At-a-Glance Metrics:

Gain straightforward visibility into product, location and document sharing, as well as approval statuses, for **enhanced ease of use** and **ongoing collaboration**.

Training Content & Support:

Training materials and resources, as well as **tech support**, are available for reference from the Supplier Dashboard.

FoodLogiQ Connect: Supplier Dashboard

From intuitive functionality, to automated workflows, ongoing training and support, there are many benefits to being a supplier on the FoodLogiQ Connect platform. As a supplier to a FoodLogiQ customer, you are provided access to a supplier community. Within this community, you can manage all of your customer's FSQA documentation, requirements and affiliated tasks. You can also review previously taken actions, communicate with your partners and access resources to support ongoing compliance with your partners' food safety programs.

Automated Workflows and Guided Tasks

The FoodLogiQ Connect platform caters to the supplier experience from onboarding to ongoing.

- Complete necessary onboarding actions, documentation requests and data submission through guided onboarding workflows and Dashboard Quick Actions
- Access customer-designed workflows to execute audits, manage incidents, and achieve GS1 and traceability readiness, directly from the supplier dashboard
- Take action on current and upcoming tasks through the Supplier To-Do List, a dynamic feature geared to support supplier compliance with partnering food safety programs

Document Management

Through FoodLogiQ Connect, suppliers can easily upload and manage all compliance and policy documents, products and ingredients, and facility or location information in one central location.

- Effectively manage data required by a variety of customers through one login
- Share select documents, products and locations with partnering organizations
- Gain insight into upcoming tasks, expiring certifications and required documentation through the Supplier To-Do List

Traceability & GS1 Barcode Labels

Traceability requirements are rapidly increasing, making it more important than ever to create accurate GS1-128 labels that include GTIN product identifiers, batch lot numbers and code dates.

- Easily produce GS1 and PTI-compliant labels with the click of a button
- Submit traceability event data in six different ways, including via web form, EDI, CSV, CSV via FTP, API and mobile device scanning
- Identify and correct event data submission errors to maintain compliance with partnering traceability programs

Training & Tech Support

FoodLogiQ is focused on making the supplier experience as user-friendly, intuitive and simple as possible. As a result, FoodLogiQ provides suppliers with a variety of resources for ongoing training and support.

- Access training videos and regular webinars geared towards the supplier audience
- Consult FoodLogiQ's Knowledge Base, a full library of support documentation
- Submit tickets to FoodLogiQ Support 24/7

“ With FoodLogiQ Connect, everything we need to fulfill customer requirements is on a streamlined dashboard. It's very user-friendly, and provides us with a checklist so we know exactly what we need to do. Connect is very transparent, making communications between Stratas and our customers as simple as 1-2-3. I wish all of our customers used FoodLogiQ. ”

Kelly Singleton, Senior Manager: Corporate Quality Assurance, Stratas Foods
