

Are you unsure if your company is in compliance with OSHA's machine safeguarding requirements?

Has one of your employees been injured due to lack of proper machine guarding? Do you want to do better for your employees?

If so, West Bend Mutual Insurance has a great opportunity for you! We've partnered with Rockford Systems to offer you discounted machine guarding assessments, a discounted machine guarding product, discounted remote assessments, and discounted training!

Since 1971, Rockford Systems has provided a full spectrum of machine safeguarding solutions to meet a variety of needs, timeframes, and cost requirements for many of the world's leading manufacturers. Rockford Systems stands committed to the prevention of injuries and fatalities. As strategic partners, they provide a value-driven approach to proactively manage workplace safety. They take a 360-degree view of understanding your organization's needs; tracking assets, inspection, and costs; identifying and prioritizing hazards to reduce risk and achieve regulatory compliance; and developing a long-term, trusted, mutually-beneficial relationship.

What they do:

- Visually inspect mechanical, electrical, pneumatic, and hydraulic systems on machines
- Function test machines
- Function test safety devices
- Analyze machine hazards
- Analyze operator tasks
- Analyze machine tooling and uses
- Detail audit findings including severity of injury, exposure frequency, and avoidance likelihood
- Provide hazard-reduction recommendations required to comply with OSHA, ANSI, and NFPA 79 standards

Success in a manufacturing environment means getting the most out of every person, machine, and process. Rockford Systems delivers proven capabilities and unmatched experience – that's why they're the industry's first safeguarding choice and most trusted partner.
