

Are you a landlord or property manager looking for that additional layer of safety to protect your property and tenants?

West Bend Mutual Insurance Company has a great opportunity for you!

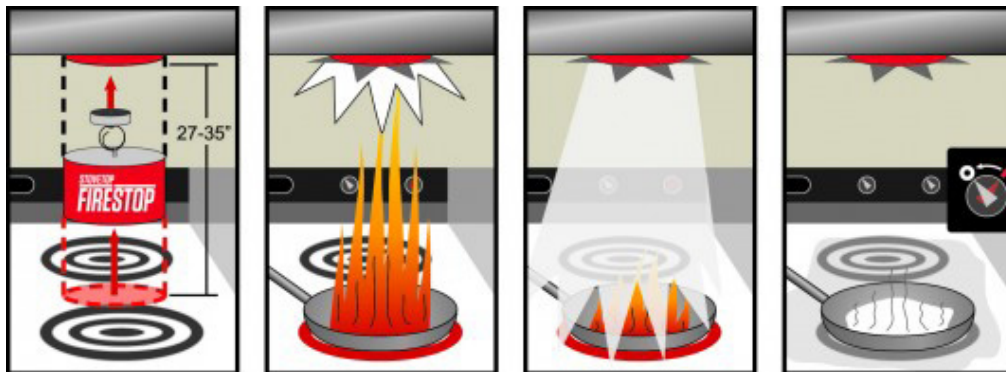

We have partnered with Louisville Fire & Safety to offer our policyholders an easy-to-install automatic fire suppression device known as StoveTop FireStop®.

WHAT YOU NEED TO KNOW ABOUT THE STOVETOP FIRESTOP FIRE SUPPRESSOR

Cooking fires are the number-one cause of residential structure fires and the StoveTop FireStop unit will provide you with 24/7 protection against property loss or fire injuries by automatically extinguishing small range-top grease fires.

StoveTop FireStop has been manufactured for more than 40 years and independently tested by a nationally-recognized testing laboratory, as well as National Institute of Standards and Technology.

The StoveTop Firestop products are designed for cooktops with a traditional vent-hood and for residences with over-the-stove microwaves. They deliver a fire suppressing powder to both front and back burners. Each product has a six-year effective life.

Note: StoveTop FireStop is not intended for deep-fat frying.

For product demonstrations and videos, please [click here](#).

West Bend has negotiated a 15% discount on these products for our policyholders!

To get started and ensure the right product is chosen, please contact Tony Cox, Louisville Fire & Safety.
