

EVO™ Network Provides Appraisers More Assignments & Efficient Order Management

Global DMS' EVO appraisal management software was designed to make everyone's daily process easier—including the appraisers.

Simplified registration process that only takes 3 minutes to complete.

One set of log-in credentials for all lender/AMC clients, eliminating confusion.

One dashboard for all orders, promoting organization & efficiency.

Once an appraiser is registered on the EVO Network, lenders are able to instantly locate their profile, establish a connection (similar to social media), and begin sending new order requests for both residential and commercial properties.

This free network also allows appraisers to seamlessly facilitate their assignments with tons of useful features – including a reliable task manager and activity log that provide automatic notifications and alerts, a robust Vendor Profile that manages crucial documents, fees, services, and more, as well as detailed reporting that can be easily customized.

- Instantly view, track, and search orders/bids
- Schedule/reschedule and complete inspections
- Events Calendar that tracks due dates
- Ability to report inspection delays
- Instant file uploads via Drag & Drop feature
- Ability to message Appraisal Desk/Office
- Respond to emails, which are logged in EVO
- Compatible with smartphones and tablets
