Nutrition Solutions

Agropur's Nutrition Solutions specializes in the isolation of whey proteins to develop innovative specialty ingredients and formulas for a variety of products like infant formula, cosmetics, medical foods and protein supplements.

Some Nutrition Solutions offerings include:

- **Alpha-lactalbumin**, a primary protein in human milk that allows infant formula manufacturers to create products that more closely resemble breast milk.
- **Glycomacropeptide (GMP)**, a casein-derived protein fraction for the medical food and oral hygiene industries.
- **BiPRO®**, an all-natural, highly pure whey protein isolate produced from pasteurized whey through Agropur's proprietary ion-exchange technology.

Whey Proteins and Fractions (>90% Protein/Specialty)

BiPRO

proteins isolated
with ion exchange technology

BiPRO® Alpha 9000

whey protein isolate/ alpha lactalbumin (ion exchange)

BiPRO® 9500

whey protein isolate (ion exchange)

BiPRO® GMP 9000

glycomacropeptide purified from cheese whey

BiPRO® C.C. 9500 (crystal clear)

acid-stable whey protein isolate

Whey Proteins and Fractions (>90% Protein/Specialty)

BZT

BioZate®

hydrolyzed whey protein

Legacy Series 3, 7, 9;
NEW Series 8000

ISO Chill

ISO Chill®

whey protein

8000 HS –
WPC 80% Heat Stable;
9000 & 9010 –
WPI 90%
