The Power of → Commitment

Effective water use is part of all business, industry and community life. GHD has a powerful global network of water skills and experience that we apply to local scenarios with local resources.

We offer a broad range of services covering feasibility studies, planning, design, project management, construction and asset management services as well as operational optimisation. Our people use selective research, perform pilot trials, fine-tune existing systems and transfer technologies from other industries to improve quality and manage asset costs.

Water Services

- Water & wastewater
- Dam engineering, safety & monitoring
- Digital initiatives
- Circular economy
- Integrated water management
- Aquatic sciences
- Automation
- Engagement
