

Safety Innovation in Utilities - Preliminary Program

FRIDAY 26 NOVEMBER	
8:30am	Registration and Trade Exhibition - Open
9:00am	Welcome Address
9:10am	Leading Through Adversity <i>Speaker TBA</i>
9:55am	<p>Critical Controls: From Identification to Implementation <i>Adam Schultz, Seqwater</i></p> <p>There are many risks we identify and manage to prevent injuries to our workers, but how do you choose where to put your effort and focus. At Seqwater that decision was easy, we needed to start with those risks that could result in a permanent injury or fatality. We needed to have confidence that the controls that would prevent these serious injuries were in place and working effectively.</p> <p>During this presentation you will learn about the journey Seqwater has been on to implement and embed Critical Control Management into how they do business, sharing the lessons they've learned along the way.</p>
10:40am – 11: 15am Morning Tea - Trade Exhibition	
11:15am	<p>Contractor Management – Partnering in Safety <i>Michael Kahler, Urban Utilities</i> <i>Gordon Lynch & Eamonn Flynn, Downer</i></p> <p>Our reliance on our contractors to support the delivery of our business outcomes includes the need to support and ensure the effective management of health and safety. Michael, Gordon and Eamonn will share the conscious shift to partnering in safety within Urban Utilities. They will discuss the core aspects and activities which have contributed to the positive benefits providing insights from both sides of the partnering relationship.</p>
12:00pm	<p>Legislation Change – Positive Disruption <i>Ben Ingram, Unitywater</i></p> <p>During this presentation you will learn about how Legislative changes are a positive disruption! Share Unitywater's journey in implementing and managing the response relating to respirable silica dust management, from initial hazard identification to our consultation process and change management approach.</p>
12:45pm – 1:45pm Lunch - Trade Exhibition	
1:45pm	Presentation 5 TO BE ANNOUNCED

2:30pm	<p>Panel & Round Table Discussion Achieving Positive Change in Safety Through Disruption</p> <p>In this final session of the day, we'll ask a panel of industry leaders what they think some of the current challenges facing our industry currently are and how they believe you can affect positive change in safety through disruption to break through some of the barriers that may be preventing us achieve the safety outcomes we are all striving for.</p> <p>We'll then harness the collective knowledge of everyone attending the summit to workshop some of these challenges in round table discussions, with each group reporting back to the summit on strategies we can take away and trial.</p> <p><i>Panellists to be announced</i></p>
3:15pm	Safety Program Concludes
	SESSION 11: MAKING GREEN GREAT AGAIN
3:15pm	<p>Wamuran Irrigation Scheme – Sustainable Growth, Enhancing the Local Economy <i>Marco van Winden, AECOM</i></p>
3:40pm	<p>Making Great Green Infrastructure Mainstream <i>Michael Lawrence, Bligh Tanner</i></p>
4:05pm	<p>Contemporary Wastewater Management Approaches in Southeast Queensland Using Offsetting and Nature-Based Solutions <i>Tony McAlister, Water Technology</i> <i>Kevin Page, Gold Coast City Council</i></p>
4:30pm	Conference Closing and Best Paper Award Presentation (<i>Sponsored by University of Queensland</i>)
4:45pm	Conference concludes
