DASHBOARD & REPORTS

Your most important business metrics at your fingertips. Keep an eye on your sales (net and gross), costs, voids, labour, promotions and revenue centre – all key performance indicators, updated in real time. Drill down into any report for details and take immediate action.

REAL-TIME ALERTS

Make timely decisions when they matter most with the help of real-time alerts. Customize push notifications for sales, costs, voids, promotions, and labour. Alerts specs and thresholds are always customizable to meet all your operational needs.

MULTI-STORE DATA & TIMELINES

Scalable to help manage your growing business. Add, monitor and receive customized alerts for any number of restaurants. With a single touch, view yesterday's performance or use the calendar to capture a snapshot of your historical data.

TAKE CONTROL OF YOUR BUSINESS DATA TODAY

DataBoard is the real-time business monitoring and alerts tool providing all the critical business performance metrics that ultimately impact profitability. The DataBoard mobile application allows restaurateurs to proactively run restaurant operations remotely or on-site using their smartphones and tablets.
