

Alberta Collaboration for Learning

Asynchronous and synchronous course and digital resource availability for the 2021-2022 school year

Alberta Regional Consortia

Dedicated to provision of professional learning opportunities at the local, regional and provincial levels

The fast-growing Alberta Collaboration for Learning has built a comprehensive library of Alberta Program of Studies content in both synchronous and asynchronous formats. From 2019-2021, more than 140 professionals (teachers, editors, copy editors, proofing staff, instructional designers, curriculum specialists and online learning professionals) created a full suite of vetted year-long Alberta online K-12 courses.

Built using the Hāpara Workspace dynamic and differentiated digital curriculum platform, the Alberta curriculum courses are easily accessible from Google Classroom or directly from within the Hāpara Learning Management Suite. Through Workspace, districts have a private library of 'master versions' of the course units and lessons that they are able to localize to specific learning situations, communities and individual learner reality. Teachers download the district units and then are able to differentiate the curriculum, learning activities, projects and so on to groups of students and individual students. Over time, districts review and evaluate the efficacy of their learning library and make adjustments as required.

New curriculum releases will be easily updated using the Hāpara functionality, saving school districts hundreds of dollars per student as we transition to a new and revised curriculum.

The Collaboration has also begun replacing textbooks and recommended reading resources in digital copyright free formats. By summer 2021 they had curated more than 200 literature, science and math resources along with a remarkable collection of 40 Alberta curriculum textbooks.

To inquire about the Alberta Collaboration for Learning, contact any of the above district partners or Roger Nakamura at Hāpara roger.nakamura@hapara.com

Alberta curriculum complete online courses

Alberta curriculum complete online courses:	Synchronous	Asynchronous	Hāpara Workspace units and lessons	Google Classroom accessible
Grades K-3: 17 full year online courses

Alberta Collaboration for Learning

Districts and K-12 educators across Alberta continue to build the growing collection, providing valuable and essential resources for the modern day classroom.

The entire collection of Alberta curriculum is accessible to Alberta schools from the Hāpara Instructional Suite, saving school districts hundreds of dollars per student.

Built from John Hattie's research and perfected in Alberta by school practitioners and educational leaders, New Zealand's Hāpara brings deep learning to online instruction with:

- Asynchronous and synchronous learning
- Easy integration with Google Classroom
- Deep differentiation capabilities
- Monitoring and managing student online research
- Direct teacher access to all student work
- Formative feedback made easy
- Collaborative and group-based online learning
- Student Dashboard organizer for Hāpara Workspace and Google Classroom
(mobile and device accessible)
- Teacher-student collaboration
- Detailed views of online activities and learning impact

Alberta Collaboration for Learning 2021-2022

A comprehensive library of Alberta Program of Studies content in both synchronous and asynchronous formats. Throughout 2020 and 2021, more than 140 professionals (teachers, editors, copy editors, proofing staff, instructional designers, curriculum specialists and online learning professionals) created a comprehensive vetted collection of complete year-long Alberta online K-12 courses.
