# EMPOWER EVERY LEARNER

### Personalized PBL with Hāpara and Google Tools

Students and teachers should consider what they've learned and what they would change. Feedback from peers & teachers helps learners push their work further.

\*BUCK INSTITUTE FOR EDUCATION (2018)

### MAKE IT PERSONAL

Effective PBL has student voice & choice built in. When you give learners the opportunity to choose their topics, develop their own questions, set their own pace, and/or determine how they should share their findings, learning becomes deeper, more engaging and more relevant.

Learners work at their own pace

Learners choose their own topics & questions

Multiple learning paths & resources that work for each learner

Learners show understanding creatively

Sound like a lot to manage? Well, it is. But digital tools can make it easier to assign, give feedback on, and organize personalized, project based learning.

## MAKE IT WORK

Set goals and organize learning in a differentiated Workspace.

Learners can gather information using
Chromebooks and Google search tools.

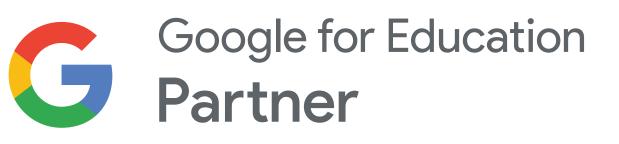

Learners can build knowledge, make connections & collaborate using Google Workspace. Keep learners focused and safe while they research online with Hāpara Highlights.

Easily keep track of learners' work and offer feedback through your Hāpara Dashboard.

Sites and YouTube give learners a public space to share their learning!

#### Hāpara provides the instructional management tools you need.
