Why Hāpara Workspace makes Google Classroom even better

Teachers and learners around the world use **Google Classroom** to make online learning possible.

In Google Classroom, teachers can share announcements, assignments and assessments online. Students can learn anywhere!

But differentiating instruction and personalizing learning aren't straightforward in Google Classroom.

What if there was a way to **streamline teaching** and learning routines and make Google Classroom even better?

Learn more about Workspace at Hapara.com				

Workspace is one digital hub for lessons, projects and units that works alongside **Google Classroom.**

It makes it **easier** and **faster** for teachers to differentiate instruction and

personalize learning.

Quickly create student groups from Google Classroom classes by dragging and dropping student names.

Find, personalize or build your own Workspaces with learning targets, resources, assessments, rubrics and extra practice.

Then with just a couple clicks, share a Workspace with the class, a group or a single learner.

Workspace gives teachers more flexibility on top of Google Classroom to organize learning resources and tasks for their students' diverse needs.

 \equiv All my classes

Students can also see their Workspaces clearly organized on one page in their **Student Dashboard.** This helps them keep better track of their assignments and assessments. No more missed work in Google Classroom!
