Top 10 Reasons to Rent Intermediate Bulk Containers

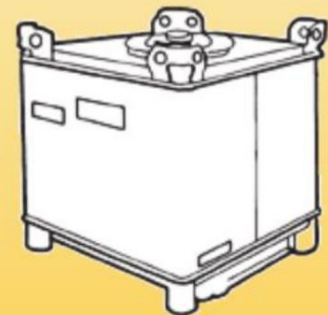

The benefits of renting intermediate bulk containers are wide-ranging and can boost not only your company's bottom line, but your own peace of mind as well:

1. **Conserve Capital** – Use stainless steel IBCs without the large capital outlay. No down payment and small monthly payments allow your company to use its cash resources to finance long-term growth.
2. **Preserve Credit Lines** – The financial flexibility of renting stainless steel IBCs enables your company to reserve valuable lines of credit for other growth opportunities.
3. **Immediate Results** – Stainless steel tote rental programs allow you to start using IBCs today! There is no need to wait for available capital; a rental program can be set up in minutes.
4. **Eliminate Non-working Assets** – You never have to worry about your IBCs not being utilized when you rent totes - simply return the tanks when you are done with them.
5. **Enjoy Tax Benefits** – The cost of renting IBCs may be an operating expense that may provide more tax benefits than the depreciation expense of buying the IBCs.
6. **Budget Flexibility** – The ease and cost savings of renting high-quality stainless steel IBCs for both short-term and long-term projects increase productivity while lowering costs.
7. **Additional Financing Options** – Companies can finance their utilization of IBCs by participating in our rental programs.
8. **Eliminate Obsolete Equipment** – Renting stainless steel IBCs means never having to deal with your equipment becoming obsolete.
9. **Environmentally Correct** – Stainless steel IBCs are returnable. Save money by eliminating wasteful drum disposal and the associated disposal costs.
10. **State-of-the-Art Equipment** – Always be assured that renting provides the latest equipment and technologies available.

Renting intermediate bulk containers can make a difference in your company's business productivity, especially when you find the right provider to partner with.
