

### Investment Objective

The Satrix MSCI Emerging Markets Feeder ETF is an index tracking fund registered as a Collective Investment Scheme, and is listed on the Johannesburg Stock Exchange as an Exchange Traded Fund. The mandate of the Satrix Emerging Markets Feeder Portfolio ("Satrix Emerging Market ETF") is to track, as closely as possible, the value of the MSCI Emerging Market Index in ZAR. The MSCI Emerging Market Index measures the performance of the large, mid and small capitalisation stocks across emerging market countries which comply with MSCI's size, liquidity and free-float criteria. To replicate the index performance the Satrix MSCI Emerging Market ETF invests in the iShares Core MSCI Emerging Markets IMI UCITS ETF (the underlying fund). The investment objective of the underlying fund is to provide investors with a total return, taking into account both capital and income returns, which reflects the return of the MSCI Emerging Market Index. Investors should note that the performance of the Satrix MSCI Emerging Market ETF relative to its benchmark may be affected on a day to day basis as a result of transactions, exchange rates and differing pricing points.

### Fund Information

Category	Exchange Traded Fund
Instrument Code	STXEMG
Number of Investors	16 683
Management Fee*	0.19% (incl. VAT)
Total Expense Ratio (TER)**	0.40% (incl. VAT)

Portfolio Size	R1.032 billion

Satrix EMG portfolio securities can be bought and sold directly through stockbrokers by both retail and institutional investors.

\*The Management Fee is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 1 year on an annualised basis. This Fee is net of any scrip lending income and Management Fee waiver, where applicable.

\*\*The Total Expense Ratio (TER) is the charges incurred by the portfolio, for the payment of services rendered in the administration of the CIS. The TER is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 1 year on an annualised basis.

\*\*\*The Transaction Cost (TC) is the cost incurred by the portfolio in the buying and selling of underlying assets. This is expressed as a percentage of the daily NAV of the CIS and calculated over a period of 1 year on an annualised basis.

The TER/TC is calculated from 01 October 2019 to 30 September 2020. The current TER/TC cannot be regarded as an indication of future TER and TC. A higher TER and TC does not imply a poor return nor does a low TER and TC imply a good return. Obtain the costs of an investment prior to investing by using the EAC calculator provided at [www.satrix.co.za](http://www.satrix.co.za).
