The platform technology underpinning the Kinetic application is based on a service-based Microsoft® .Net architecture, optimized on Microsoft SQL® and standardized on Microsoft Azure®. It delivers the latest technology advancements requested by manufacturers including cloud, IoT, and AI/ML. Kinetic delivers a continued partnership in innovation to futureproof your ERP investment.

Businesses can easily evolve their use of Kinetic with business process optimization from our Business Process Management (BPM) and Epicor Functions solutions and use technology such as Kinetic RESTful service APIs to extend to other applications where needed in an upgrade-resilient and secure way. The Epicor Kinetic platform promotes efficiency as it helps our customers to both use and enhance Epicor applications at a business level - rather than a technology level.

The capabilities of the Kinetic Platform include:

- Scalable, service-based architecture
- Mobile, browser-based user experience
- Virtual Agent
- Epicor Learning
- Business Process Management and Epicor Functions
- Integration readiness with RESTful service APIs
- Purpose-built IoT applications
- Application Studio configuration
- Deployment flexibility, cloud or on premises
- Connected people, systems, and processes
- Secure cloud solutions for your business

Improved Employee Experience Drives New Levels of Efficiency
User Experience
The way we work and interact with technology is constantly evolving to meet the needs of new generations of workers. The challenge for many is attracting this workforce, and worker experience plays a strategic role in this effort. Employees expect a consumer-grade experience at work with modern and intuitive applications that boost productivity and simplify everyday tasks. Cloud mobility is also a key aspect. No matter if they are working from home or walking through the shop floor, workers need to have access to their applications through the device and browser of their choice.

Evolve your business technology to meet the needs of todays workers.

Kinetic offers a mobile, browser-based user experience that enables employees to complete tasks in less time while optimizing their personal workflows.

The Kinetic users experience delivers a user experience that is:

- Made for use anywhere, browser-based in the cloud, on any device with a consistent experience

- Made for personal use with guided workflow, easy tailoring, and the ability to connect digitally

- Made for efficiency and greater productivity with a simple, easy to use interface that offers industry-focused features and leverages cognitive technologies for greater automation

Personalization
Create your own experience to maximize productivity. Simplify your job with quick optimizations to the personal workflow in the screens you use every day. Configure grids, hide/show UI fields, or collapse/expand panel cards depending on your needs.
