

# Digital Banking

INTEGRATION, QUALITY ASSURANCE, AND MAINTENANCE

## The Challenge

If Digital Banking is essential, why aren't all Banks already investing? Here are some of the challenges and roadblocks banks face:

**Time constraints.** Banks must juggle competing priorities, including their brick-and-mortar offerings.

**Project complexity.** Digital Online Banking products require a range of standards, customized features and configurations to ensure seamless user experiences.

**Lack of technical expertise.** Successful implementation requires a depth of subject-matter expertise that most banks do not have.

## The Solution

By partnering with ValueMomentum, Banks can accelerate the timeline and scale up the impact of their digital efforts. **We offer the industry-specific, technological expertise Banks need to make their digital initiatives successful.**

## Leverage Critical Capabilities to Stay Competitive in the Digital Era

Successful modern Banking relies on providing the exceptional, digital experiences today's consumers expect. With over one-third of all Banking institutions already investing in modern technologies such as open APIs, big data engines, or chatbots, there's no question that the race toward digital adoption will ramp up. Staying competitive, then, means staying up-to-speed.

## Our Key Services & Offerings

### API Integration

As a gateway between systems, vendors, partners, and ecosystems, harnessing API's game-changing connectivity has become a priority for banks of all shapes and sizes.

Ready to embark on a successful API integration journey? ValueMomentum can help your bank:

1. **Identify** which APIs are necessary for your business
2. **Develop processes** for the full API development lifecycle
3. **Build strong security** in your API gateway
4. Establish enterprise-wide transparency and cultural alignment

## Quality Assurance and Testing

Accelerate acceptance testing with digital capabilities. ValueMomentum can help drive your testing endeavors by providing expertise on:

Cloud & Mobile

Test Automation Tools

Non-functional Testing

Agile & DevOps methods

Analytics for Testing

Test data & models for coverage

| Test Stage            | Functional Testing Types |             |           |          |           |         |          |            | Non-Functional Testing Types |             |          |            |       |             |               |            |
|-----------------------|--------------------------|-------------|-----------|----------|-----------|---------|----------|------------|------------------------------|-------------|----------|------------|-------|-------------|---------------|------------|
|                       | Functional               | Integration | Interface | Database | Migration | Reports | Branding | End-to-end | Load                         | Performance | Security | Compliance | Audit | Penetration | Accessibility | Regression |
| SIT                   | █                        | █           | █         | █        | █         | █       | █        | █          | █                            | █           | █        | █          | █     | █           | █             | █          |
| UAT                   | █                        | █           |           |          |           | █       | █        | █          |                              |             |          | █          |       |             | █             |            |

## Application Maintenance

Digital transformation takes time, so maintaining legacy apps and platforms remain a crucial responsibility before, during, and even after the transition to Digital banking. Avoid letting defects and problems snowball with ValueMomentum’s Application and Maintenance team. We help keep the lights on your legacy system so your team can focus on the strategic initiatives that really matter.

**Defect Fixes.** Prevent small bugs from snowballing into expensive, full-blown infestations.

**Problem Management.** Address problems at their root to ensure defects don’t recur and take away from productivity and user experiences.

## About ValueMomentum

ValueMomentum provides IT services and software solutions to insurance, healthcare, and financial services firms. Customers choose ValueMomentum for its track record of delivering value and driving the momentum of customers’ business initiatives. ValueMomentum accomplishes this mission by applying a time-tested formula of combining strong technology expertise with deep industry experience.
