# Quality Assurance & Testing
FOR COMMERCIAL ONLINE BANKING IMPLEMENTATION

*Grow, Attract and Retain Business Relationships
in a Highly Competitive Digital Environment*

In the digital era, meeting the ever-evolving demands of commercial banking customers begins with a Commercial Online Banking Platform. U.S. financial institutions across the board are realizing the potential of digital banking platforms to build strong relationships, ensure long-term growth, and drive profitable returns from the businesses they serve. The future of banking is digital, and ValueMomentum is ready with the industry-specific, technological expertise institutions need to get there.

Commercial Online Banking applications are complex, requiring product teams to manage a wide range of features and configurations to create exceptional user experiences. From managing integrations to ensuring functional, system, and end-to-end validation, ValueMomentum's team of experts have the industry knowledge and technological expertise necesasry to make designing and implementing a comprehensive testing strategy, simple and efficient.

TEST STRATEGY

Test early, test often, and automate to ensure constant feedback

7

Focus on key elements or failure points of COLB Product Implementation: Integrations, Data Migration, Product Customizations

6

Implement and automate a larger regression suite with functionality that runs with every major build

5

4

Design regression for key fixes & features coming from GA

1

Create and automate Smoke test cases

2

Select hardware (machine and RAM) that integrates with other systems, while also providing quick feedback to builds

3

Drive collaboration and partnership strategy between vendor testing team & Bank's professional services team, product team, and line of business.
