

Spotlight Reporting

Intermediate Full Stack Developer

Spotlight Reporting is a truly transformational company at the forefront of the exciting and evolving cloud-based software industry. It has exploded onto the market with software that offers advanced reporting and business intelligence to financial advisors, accountants and organisations across the globe.

With offices in Australia, New Zealand, the UK and the US, this award-winning business is looking for a Senior Full Stack Developer in Wellington that has true passion for helping and transforming business outcomes through technology and a desire to get the most out of people.

Job Description

We are looking for an intermediate level Full Stack Developer passionate about web application development to join our product team in building award-winning financial business intelligence reports.

You will be responsible for building server based software, web services, and related client software in our software products.

You'll play a significant role in the development of integrations with our application partner APIs, ensuring secure authorisation, data accuracy and a consistent user experience.

You will also be responsible for the development of a large part of the server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end.

Responsibilities

- Ownership of integrations with a number of partner applications APIs.
- Making relationships with application partners and keeping on top of API changes.
- Designing and Maintaining our applications RESTful API.
- Integration of user-facing elements developed by front-end developers with server side logic.
- Building reusable code and libraries for future use.
- Optimization of the application for maximum speed and scalability.
- Implementation of security and data protection.
- Design and implementation of data storage solutions.
- Occasionally dipping into devops on our cloud platform.
- Maintaining your own development environment.

Skills And Qualifications

- Intermediate level experience with C#, ASP.NET MVC, Visual Studio, SQL Server, CSS, HTML.
- Bonus: Prior experience working within a front end environment built on React or a similar modern JavaScript framework.
- Tertiary qualified with a degree in Computer Science (or something similar), or a few years of solid experience – we're expecting you to get up to speed quickly.
- Self-motivation and pragmatism – you love working in a fast-paced environment and understand how to balance competing priorities and understand the benefits of delivering value to end users in an iterative manner.
- Excellent communication skills – you will be able to clearly present your ideas and rationale from a remote work setting.
- Experience with Git.
- Knowledge of OWASP security principles.
- Experience with modern CI/CD processes and DevOps.
- You must hold a genuine desire to learn fast, work with a talented team but also contribute to our customer's first ways of working.

To apply for this role, please email a cover letter and CV to careers@spotlightreporting.com. Your application will be looked at by our Development Team Manager, Andrew Thompson.
