

Customer Release Notes

Product ID: 7707 IntelliNet 2.0 Fire Subscriber

Software Version: 7.0.02

Release Date: July 31, 2020

Overview:

This document describes the new features, improvements, bug fixes, and workarounds/known issues (if any) for this release. The previous version was 7.0.1 from September 12, 2019.

Improvements:

1. ACORN-2557: Upgrade drivers to improve stability

Drivers were upgraded to reduce the number of watchdog resets, and improve overall stability and performance.

WARNING - This update should not be used to upgrade units running version 5.1.15. Attempts to upgrade from this version could result in an unrecoverable failure.
