

THINK YOU KNOW GRASSHOPPER?

PUT YOUR SKILLS TO THE TEST.

Students of the stripe, now is the time to dust off your Grasshopper knowledge. It's less of a pop quiz and more of an opportunity for bragging rights. We're sure your friends will be impressed.

Q: Who is the founder of Grasshopper Mower?

A: Elbert Guyer, a Kansas farmer and engineer, founded Morigde Manufacturing in 1958—which later perfected the Grasshopper Mower.

Q: What was Elbert's first invention sold by Morigde?

A: The portable grain dryer, which revolutionized farming worldwide, allowed farmers to harvest grain early then dry it to their desired storage-moisture content.

Q: Who designed the original Grasshopper logo?

A: A local high school student designed our iconic logo in 1965.

Q: What year did Grasshopper introduce the first swing-out, dual-level steering levers on a zero-turn mower?

A: 1973

Committed to the Cut.®

Q: Who is the current president of Grasshopper?

A: One of Elbert's children, Stan Guyer, is the current president, and only the second leader in the company's history. Elbert's other children, grandchildren and family members are responsible for various leadership roles in the company.

Q: What's the name of Grasshopper's mascot?

A: G-Mow is the company's fun, public face, showing more than just personality. He also reminds employees and customers to stay confident and determined, visually representing the brand's values.

Q: How many countries have Grasshopper dealerships?

A: The company has an international dealer presence in 40 countries, plus all 50 states.

Q: What major customer-driven innovation was added to select mowers in 2004?

A: The PowerFold® electric deck lift launched, allowing the operator to fold up the deck at the touch of a button. No heavy lifting required.

HOW'D YOU SCORE?

Whether you got 8/8 or had to guess on more than a few, we hope you learned a little bit about Grasshopper. Check the blog later for more mowing and lawn care tips and how-tos.
