

Automated Eligibility Data Verification

Is your staff spending valuable time verifying eligibility data? Let DataTug do it!

DataTug™ is a unique product that knows how to find the information you need quickly and accurately for any health plan. DataTug can save you hours of time every day, saving you money and increasing your productivity. DataTug extracts required data automatically from health plan web sites and ANSI X12 270/271 and other data portals.

DataTug provides real-time batch processing of eligibility verification. It has a flexible data interface that allows for searches of members provided in various file formats, or through its proprietary API.

Who can benefit from DataTug?

- ✓ MSOs, IPAs, PPOs and other medical groups
- ✓ Healthcare providers

DataTug makes it easy for medical groups to verify eligibility for:

- ✓ Members with pended healthcare claims
- ✓ New members in new claims
- ✓ For California medical groups, monitoring eligibility to comply with Assembly Bill 1324
- ✓ Discrepancies found in Eligibility Manager® or Cap Check™

“We have saved
thousands of dollars
just on AB1324 issues
using DataTug”
