

# Universal API

## Innovate to Thrive in Today's Risk-Based Market

This application enables software vendors to interface existing systems with EZ-CAP. This Application Programming Interface (API) is an expert modification tool for developers to format request and response file transactions.

## Access Data with Seamless Interfacing

### Aligning Client Needs By Exposing Access to Citra Internal Applications

This application enables software vendors to interface existing systems with EZ-CAP. This Application Programming Interface (API) is an expert modification tool for developers to format request and response file transactions. Vendors continue to offer users one point of entry through their systems, while seamlessly integrating the EZ-CAP managed care capabilities with no visible transitions.

Citra's application-driven API approach leverages focuses on security for the establishment of a trusted connection, data selection to ensure queries for necessary information and data response scope, and return format to maximize automation and provide the highest value.
