Company Overview_

When Experience Matters

Cyber Security solutions you can count on.

Triskele Labs

"

Triskele Labs delivers on our strategic goals. Their team are very easy to work with and management are extremely accessible. Our company considers Triskele Labs a cultural partner, with a clear understanding of not only our working environment, but also our business sector. Always a pleasure to work with the Triskele team.

Chad Morrison_Head of Non-Financial Risk
Regional Australia Bank

When choosing your Cyber Security partner, experience matters

Today's business environment is more competitive than ever. To succeed and thrive, organisations need to continuously innovate and take risks. However, when it comes to your data, risk is the opposite of what you need.

In a world where everything is online and connected, data is quickly becoming the most valuable asset of any organisation. Novel technologies continue to open doors for businesses to add value, but also accelerate sophisticated and damaging cyber-attacks.

When the average business cost to recover from a security breach is AUD$3.6M, keeping your data and networks safe can quickly become a major focus that distracts you from what truly matters — growing your business and serving your customers.

We take pride in delivering tailored Cyber Security solutions and providing an excellent customer experience to give you peace of mind around Cyber Security. At Triskele Labs, we change the game for Cyber Security by delivering a holisitic, customer-centric approach.

Cyber security solutions you can count on

Australian businesses — big and small — trust us to keep their data and systems safe 24x7x365. We work with you to understand your risks, goals, challenges and culture to develop Cyber Security solutions tailored to your business. With us by your side, you can be confident that your data and systems are secure — and that you have a trusted, responsive and experienced partner to protect your business.

We combine a set of offensive, defensive and advisory services that have been tested and honed over years in the field to provide you with a holistic, fit-for-purpose Cyber Security solution.

Learn more about our Advisory, Defensive and Offensive services on the following pages.

Advisory

Australian businesses are among the most vulnerable to cyberattacks in the world. As an Australian owned company, we bring deep market knowledge and experience, making us a partner you can trust.

Our expert team work closely as your advisors to help fix the gaps — not just point them out.

Whether you need help with your overall cyber strategy, a review of your risk management approach, advice on meeting compliance requirements, or are looking for a trusted and long term Cyber Security partner, we are the people you want to talk to.

Defensive

It is no longer a matter of if, but when. No matter their size, Australian organisations are being targeted by cyber attacks. If you have data and you're connected to the Internet, you're a target.

The most effective way to reduce your risk of being compromised and ransomed is to implement a 24x7x365 Managed Detection and Response (MDR) service.

While other MDR providers say they do, Triskele Labs' MDR service —DefenseShield — truly operates 24x7 every day of the year. Our team of security experts have eyes on your network around the clock, monitoring your systems so you can rest easy.

Offensive

Do you know where the gaps are in your systems? Chances are, the bad guys do. Our CREST International Registered Offensive Security Team, made up of 15+ Ethical Hackers, work with our partners to find the holes in your systems before they can be exploited.

Our team have been entrusted by APRA regulated entities, Local and State Government and private entities alike to challenge their systems and identify the gaps that need to be fixed.

Penetration Testing is one arrow in your armory of Cyber Security that you cannot afford to neglect.

Our team of experts

We consider every business we work with a partner — not just a customer.

Since 2014, Triskele Labs has grown from a team of two to over 40 people — and we continue to grow. Every member of our team is a highly qualified expert in their field, and we all invest time into keeping up with the latest developments and trends to ensure we're experts not just today but also tomorrow.

While we all specialise in different aspects of Cyber Security, all of us are brought together by a common desire to deliver exceptional outcomes and experiences to our customers.
