**Tailored security options that offer powerful protection**

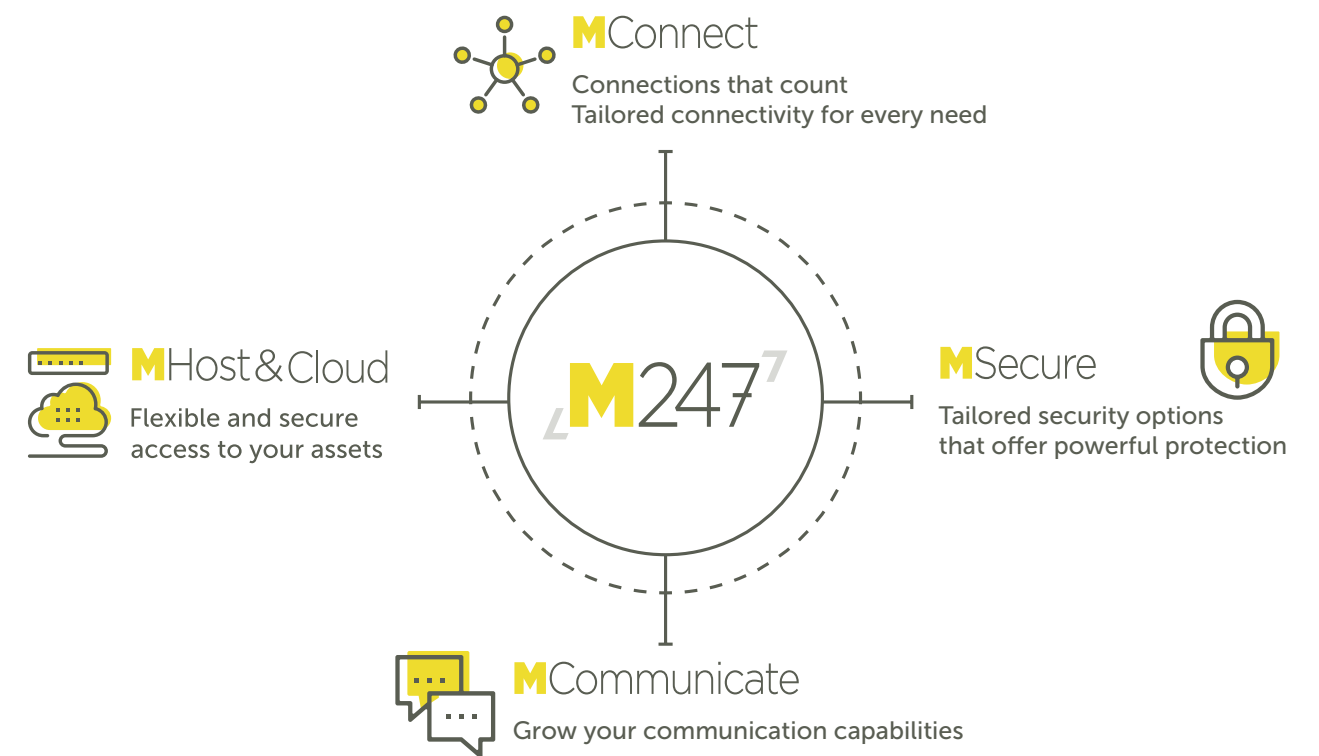

# Your global technology partner for growth

M247 are proud to be recognised as a leading connectivity and cloud services partner for growing businesses.

Technology can transform your business. We believe in technology's power to take you further. We configure networks, systems and data to help you connect with more places, serve more customers and employ more people.

We focus on driving your business forward – not holding it back. When your business is growing and your IT estate gets more complex, we find a way to keep things simple.

M247 products are developed with business growth in mind. Whatever your requirements, we have the technology to help you transform.

Host to 7,000 servers internationally

50 peering points across the globe

With network operating speeds of up to 1Tbps

Global network serving over 10,000 customers in 110 countries

Operating in 38 of the world's key internet exchanges

Over 70 strategically placed data centres with two M247 wholly owned

# How we work with you

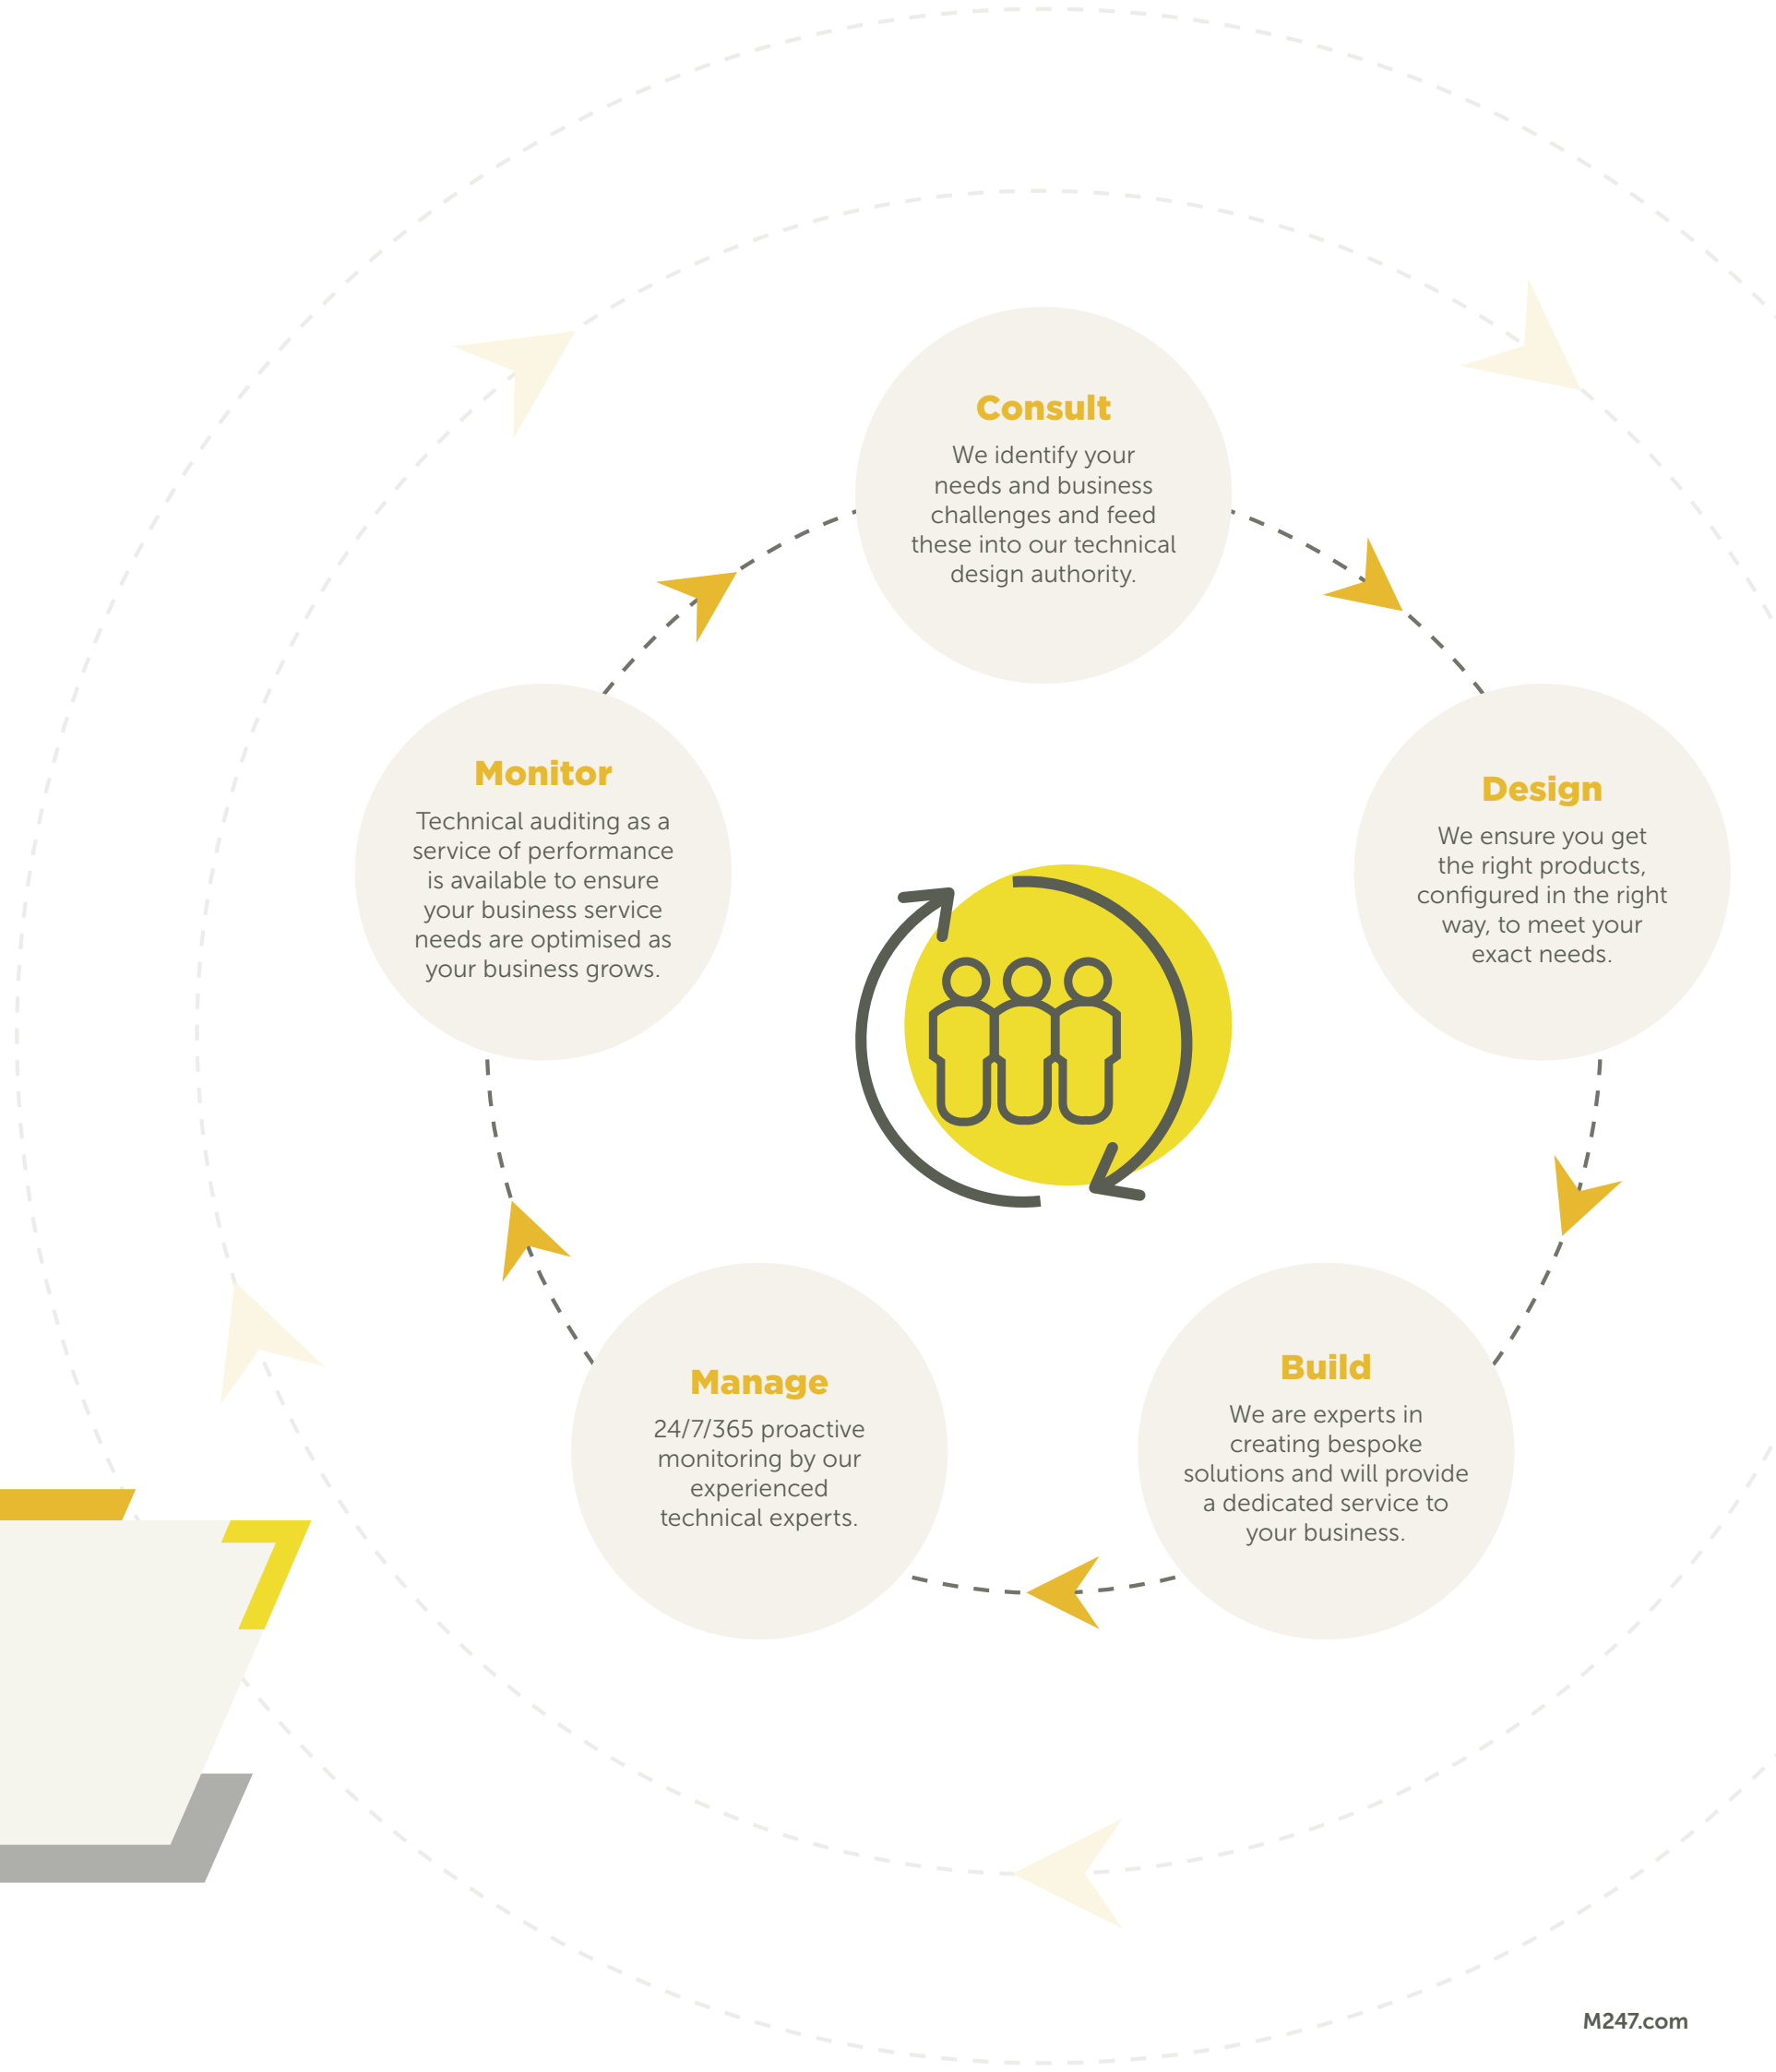

Our focus is on giving your business the edge with our security products. We ensure that we have a comprehensive understanding of your security needs and promise to deliver quality and flexible solutions to enable you to flex and scale your service to suit your individual requirements.

We'll grow with you, bringing with us over 20 years' experience of delivering world-class connectivity and rock-solid infrastructure services to businesses.

"We wanted a reliable supplier with a good service delivery reputation: M247 were easy to work with throughout the procurement process and this has continued into the implementation and BAU state."

# MSecure Services

Robust digital security is important for any organisation, but it's absolutely critical for ambitious, growing businesses. The cyber threat facing companies has never been greater, but our tailored secure solutions mean you can stay focussed on your business and commercial growth.

- 7 Latest technology from leading partners
- 7 Flexible solutions designed to work together in almost any combination, as single solutions or as a complete package
- 7 Enterprise-grade secure servers
- 7 ISO27001 Security Standard

# Managed Firewalls

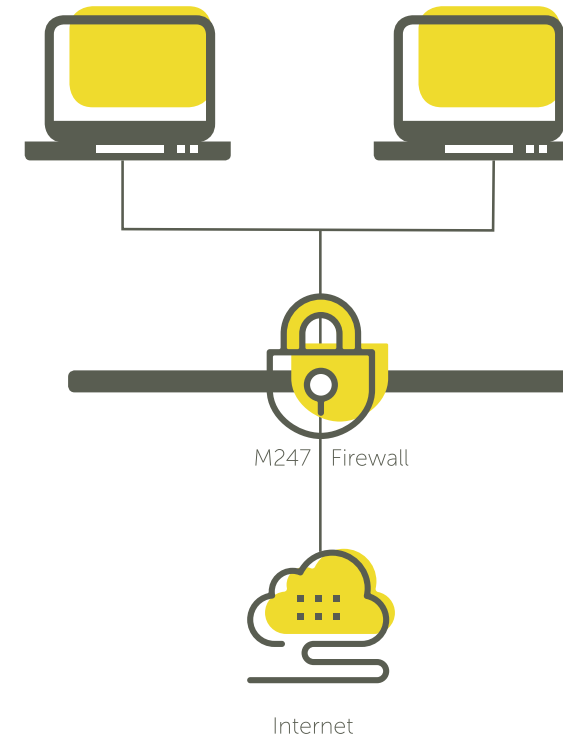

Firewalls are a vital component of your network security control. This gateway-level solution uses predetermined rules to analyse and manage traffic entering and leaving your network.

We can implement hosted, virtual, dedicated and on-site firewall solutions, based on tried-and-tested hardware. Our technical team will work with you to find the right solution, with strict SLAs in place to make sure every network element is covered for repairs. There are no hidden costs because the solution is delivered as a fixed-cost managed service.

- 7 Preconfigured and fully managed by M247
- 7 Complete Unified Threat Management (UTM)
- 7 Includes scanning traffic for viruses, anti-spam, web filtering and intrusion prevention

## M247 Firewalls include:

- 7 Antivirus
- 7 Intrusion Prevention System (IPS)
- 7 Web filtering
- 7 Anti-spam
- 7 Data Leak Prevention (DLP)
- 7 Application control

## Support Model:

### Tier 1

- 7 Up to five sites
- 7 Up to 50Mbps connectivity and up to 15 firewall policies can be created
- 7 Perfect for organisations requiring very basic firewall functionality
- 7 Access to industry-leading, next-generation firewall services at great value with no capital outlay
- 7 Seamless scalability to Tier 2 as your organisation grows

### Tier 2

- 7 Up to 15 sites
- 7 Up to 200Mbps connectivity and up to 50 firewall policies can be created
- 7 Perfect for organisations requiring VPN connectivity
- 7 Web content blocking functionality
- 7 Anti-spam support for on-site or hosted mail services
- 7 Access to industry-leading, next generation firewall services at great value
- 7 Seamless scalability to Tier 3 as your organisation grows

### Tier 3

- 7 Multi-site
- 7 Variable UTM functionality
- 7 Up to 500Mbps of connectivity and no limit on firewall policies
- 7 Perfect for organisations requiring VPN connectivity
- 7 Web content blocking functionality
- 7 Anti-spam support for on-site or hosted mail services
- 7 Access to industry-leading, next generation firewall services at great value

For higher specifications and a complete suite of UTM functionality with dedicated resource, we offer high availability cloud hosted firewalls.

# Managed DDoS Protection

No network operator likes to hear the phrase 'DDoS attack', but we will help you stay fortified against this kind of large-scale security threat.

Secure your network against large-scale attacks with our scalable and efficient anti-DDoS solutions. Designed to detect and successfully mitigate advanced attacks, such as those that aim to exploit applications, web servers and DNS vulnerability, and even hit-and-run or botnet-type attacks.

This level of protection is crucial for websites and customer-facing portals. Our solutions have been developed to protect uptime, data integrity and ultimately safeguard your revenue and reputation.

Our expert engineers are there to support you during any attempted attack and use the most sophisticated security technology, bringing in the right tools for the job.

- 7 Absorbs traffic spikes and "scrubs" data to pass on only "in profile" data
- 7 Mitigates multiple vector attacks
- 7 Continued service with DDoS attempt successfully mitigated

# Content Filtering

Take control of your network. Our content filtering service assists in controlling or blocking content deemed inappropriate for internal viewing, allowing you to protect employees and boost productivity.

Delivered as a fully-managed or co-managed service, our content filtering packages are available at a fixed rate, so you can keep everyone safer in the digital world.

- 7 Web browser management across specified websites, including social media
- 7 Time-of-day and duration-based controls
- 7 Meet compliance requirements with comprehensive browsing habit reports
- 7 Internet Watch Foundation list provides bases for protection
- 7 Optional customised policies for users, content categories or location

M247 content filtering is not just about blocking inappropriate content – we empower network owners to operate responsibly by controlling the types of content that people can access and view.

# Closed Circuit Television (CCTV)

We provide connectivity to CCTV and camera equipment installed on street furniture or buildings.

With specially trained engineers, who have years of experience with installing CCTV connectivity circuits. Our state-of-the-art 247Cloud can offer secure storage for footage as required.

- 7 Industry experts
- 7 Wireless connectivity
- 7 3G and 4G connectivity
- 7 Fast installations
- 7 Camera relocations and static installs
- 7 Specially trained and vetted engineer

## Different requirements for CCTV:

- 7 Antisocial behaviour
- 7 Fly-tipping
- 7 Criminal activity
- 7 Public safety
- 7 Political and public events
- 7 Automatic Number Plate Recognition (ANPR)
- 7 Bus lanes

## CCTV options from M247:

- 7 Standard CCTV
- 7 ANPR

# Business Continuity

Having a robust business continuity plan in place costs far less than losses suffered when things go wrong.

A solid IT disaster recovery foundation underpins good business continuity, going deeper than just IT systems. It should cover everything from geography and work premises to connectivity, telephony, key contacts, supplier and vendor management.

## Business Continuity options from M247:

### Connectivity

It's important to have resilient internet connectivity and there are many different methods that can be provided as failover options.

### Cloud, Infrastructure and Back-up

Offering diverse hosting and cloud services can enable your business continuity planning with secondary or tertiary options for all your infrastructure needs, with private, public or hybrid services.

### Communications

Our range of communication products, like hosted telephony and unified communications, are cloud-based solutions that can be operated from any location and are ideal as part of your business continuity planning.

### Security

Stopping breaches in security is one of the major focusses of businesses. We have services that provide complete Unified Threat Management and anti-DDoS solutions to protect uptime and data integrity.

"We were blown away by the speed at which M247 turned our request around. From initial brief to go live took only 6 weeks. During this time their technical team worked with us to understand our needs and challenged us to think about the future needs of the business too."

**Prisma Analytics**

# International Network

We have one of the biggest networks in the world, powered by world-class infrastructure. At M247 we pride ourselves on our ability to help take businesses further and support growing needs, whether you are UK or globally focussed.

- 7 In-country presence and account management support in London, Manchester, Bucharest, Malaga and New York
- 7 More than 10,000 customers in over 110 countries
- 7 More than 70 strategic data centres, including locations in leading finance capitals London, Singapore, Zurich, Frankfurt, New York and Tokyo
- 7 Four wholly-owned data centres
