

247Cloud™ at a glance

Harnessing the very best in hardware and software partnerships, our 247Cloud™ platform is significantly raising the bar for business cloud solutions. We offer networking up to 100Gbps, all-flash acceleration and industry-leading security.

M247 technology and service infrastructure

Hardware

- Built on hyperconverged infrastructure
- Powered by Nutanix, Cohesity, VMware and Zerto
- Service provider grade Cisco networking

Virtualisation

- Fully Software Defined (SDDC)
- Full VMware software portfolio
- Nutanix Enterprise Cloud Suite

Data Centre

- Located in London and Manchester, UK, and Bucharest, Romania
- We have presence in some of the world's most important DC locations with our extended network of over 72 data centres in 32 cities, across 26 countries

Support

- 24/7/365 global support

247Cloud™ includes:

Compute

- High performance, low density
- 1/10/25/100Gbps networking capabilities
- Fully resilient and highly available architecture
- Web scale attributes

Storage

- Flash accelerated
- Low latency
- High IOPS
- Distributed (HCI) storage
- Infinite scale
- Optimised for virtual and cloud native workloads

Network

- Cisco Service Provider grade network
- Fully Software Defined (SDN)
- VMware NSX-T or Nutanix Flow
- 25/100Gbps networking
- Low latency
- International reach
- Direct connectivity to hyperscale
- Clouds up to 10Gbps
- Integrate virtual data centre with physical co-located kit (From any of our DC's)

Data Protection

- File immutability for ransomware protection
- Policy driven protection
- Comprehensive application protection
- Secondary data management
- Industry leading Recovery Point Objective (RPO)/Recovery time Objective (RTO) (Sub 10 seconds)
- Fully automated and orchestrated workload failover/failback

Virtualisation

- VMware/Nutanix Hypervisor options
