

MHost

FLEXIBLE AND SECURE ACCESS
TO YOUR ASSETS

TRANSFORM WITH TECHNOLOGY

M247⁷

We believe in transforming businesses through intelligent and tailored technological solutions.

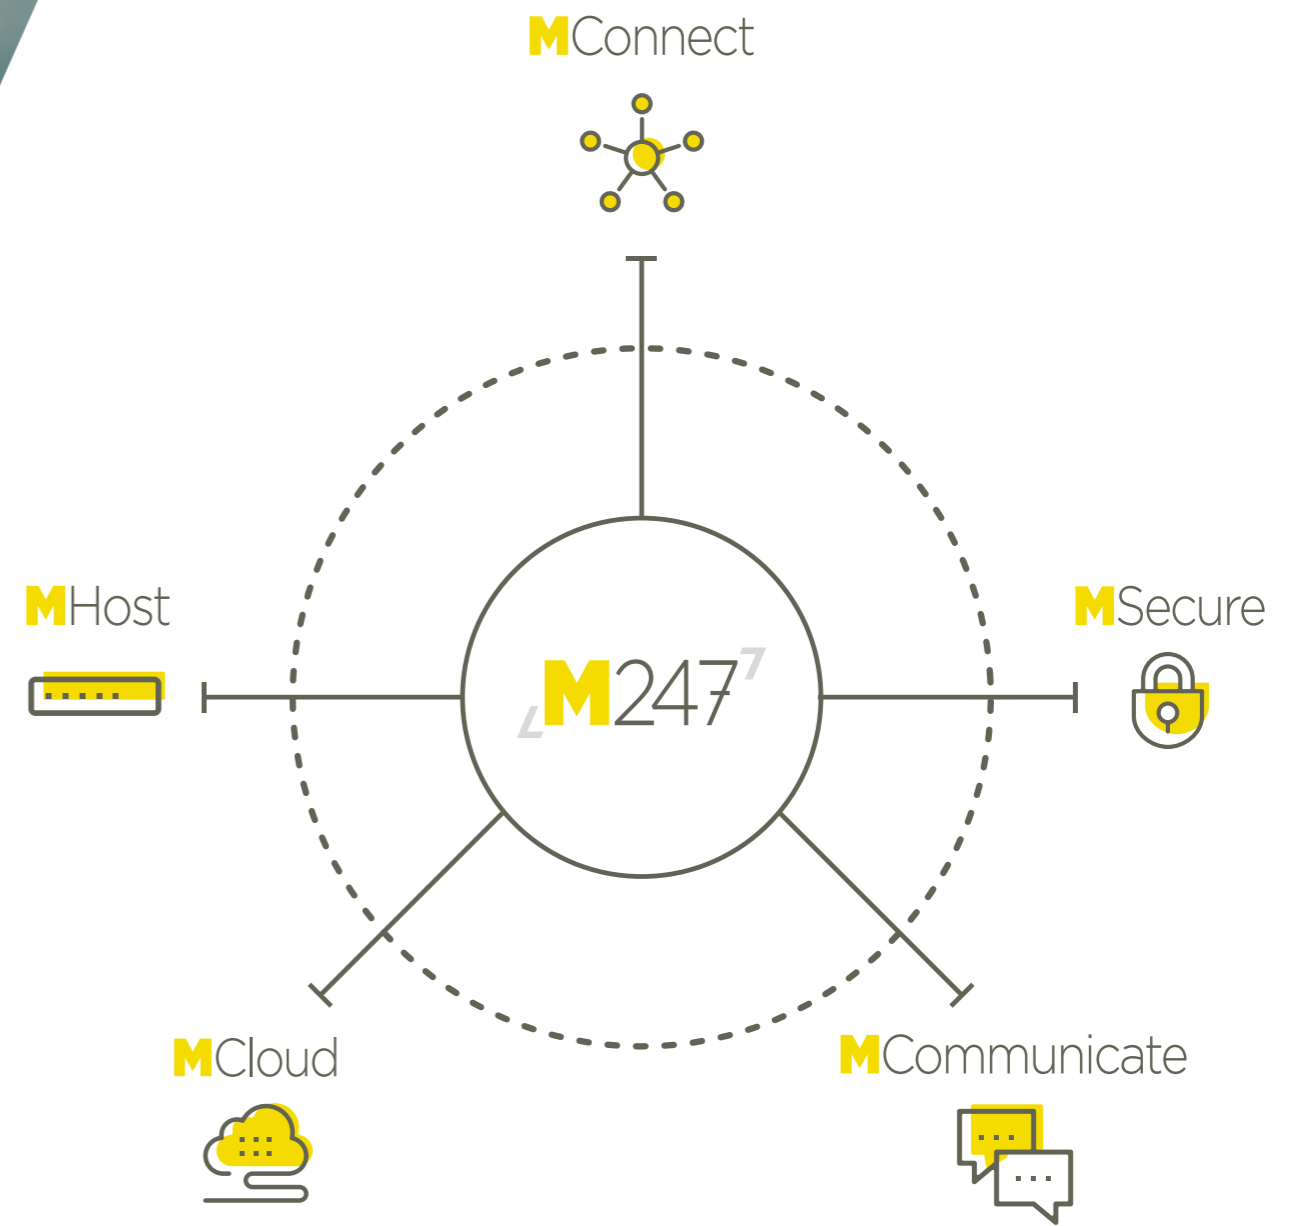

We configure networks and systems to help your business connect with more places, serve more customers and employ more people.

But it's not just about powering your operations, it's about us investing in your business as much as you do. Thinking about tomorrow and not just today, supporting you to achieve great things through technology.

That's why we never outsource our support services, so our team of technical experts are always here when you need them.

M247 Services

M247 products are developed with business growth in mind, whatever your requirements we have the technology to help you transform.

M247 Hosting

FLEXIBLE ACCESS TO YOUR ASSETS

As businesses grow, the demand and complexity of requirements from their IT estate grow too. Keeping this under control and on budget can often become a problem – leading to unnecessary expense and often security risks.

Moving your IT estate into The Cloud or a datacentre gives you the flexibility to scale your IT in line with your business needs and budget. We've got the solutions that can make a real difference to your business future without compromising your security, telephony, call recording and contact centres.

The M247 Infrastructure

DATACENTRES BUILT FOR YOUR NEEDS

Security and privacy are paramount to every organisation, therefore our privately-owned datacentres are state-of-the-art premises that offer you everything you need to support your business.

No two businesses are the same, and so our infrastructure offers flexibility and a choice of hosting and cloud options.

- 500 – rack capacity, is pre-populated with high quality 47u cabinets.
- Immediate availability from quarter rack (11u) to full rack (47u)
- Multiple diverse optical fibre entry points
- 80Gbps of live internet connectivity
- Resilient N+1 UPS power protection

ISO 27001 Security as standard

Security is a priority for us, and we always go beyond what's required to ensure each of our customers trust that their assets are completely secure.

We have successfully completed the ISO 27001 Security Standard, we have a robust Security Policy in place and deliver regular security training to ensure every member of the M247 team is kept informed of the latest security requirements.

Unrivalled service

We run a global network serving customers in every time zone – our customers never sleep, so neither do we. No matter what time of the day or night, technical support is always available, anywhere in the world.

Because M247 houses mission-critical data,
a robust commitment to security
is an absolute priority

Datacentres and Colocation

SECURITY AND PRIVACY

High availability platforms designed to function as either a single service or a combined offering, so your business can benefit from cost-effective, off-premise reliability.

Colocation is ideal for companies that need to have all, or part of, their own hardware and software locked safely inside an internet datacentre. With excellent connectivity, physical building security, power, resilience, diesel generators, 24/7/365 monitoring, air conditioning and access to many different enhanced features, all available as standard.

- 5 owned and managed datacentres across the UK and Europe
- Presence in over 40 datacentres globally
- Guaranteed service delivery
- Interconnection of datacentres for resiliency and disaster recovery
- Secure access 24/7/365
- Self-healing IP network
- Quarter, half or full rack availability
- Suites of multiple racks available for larger organisations
- Scalable capacity available immediately
- Predictable cost model

Dedicated Servers

INSTANT ACCESS TO YOUR DATA AND TOOLS

Our Dedicated Servers are reserved exclusively for your business, whether you host applications, software services or provide data back-up and storage. We own and manage the hardware on your behalf, giving you access to configure and operate the server remotely.

- Enterprise class servers
- Secure, environmentally controlled Tier 3 datacentres
- Server grade hardware – futureproofing your hosted data
- Low carbon footprint
- UK and European network
- Access to additional services

Managed Servers

SECURE ACCESS FROM ANYWHERE IN THE WORLD

Our Managed Server solution gives you the option to lease equipment from us over an agreed term, hosting this within one of our Tier 3 datacentres.

- Secure access from anywhere in the world
- M247 managed operating systems, general hardware and bandwidth
- Retain full control of software and installation
- Bespoke specifications available
- Multiple resilient links
- Cost effective business solution

ISO 27001
Security Standard

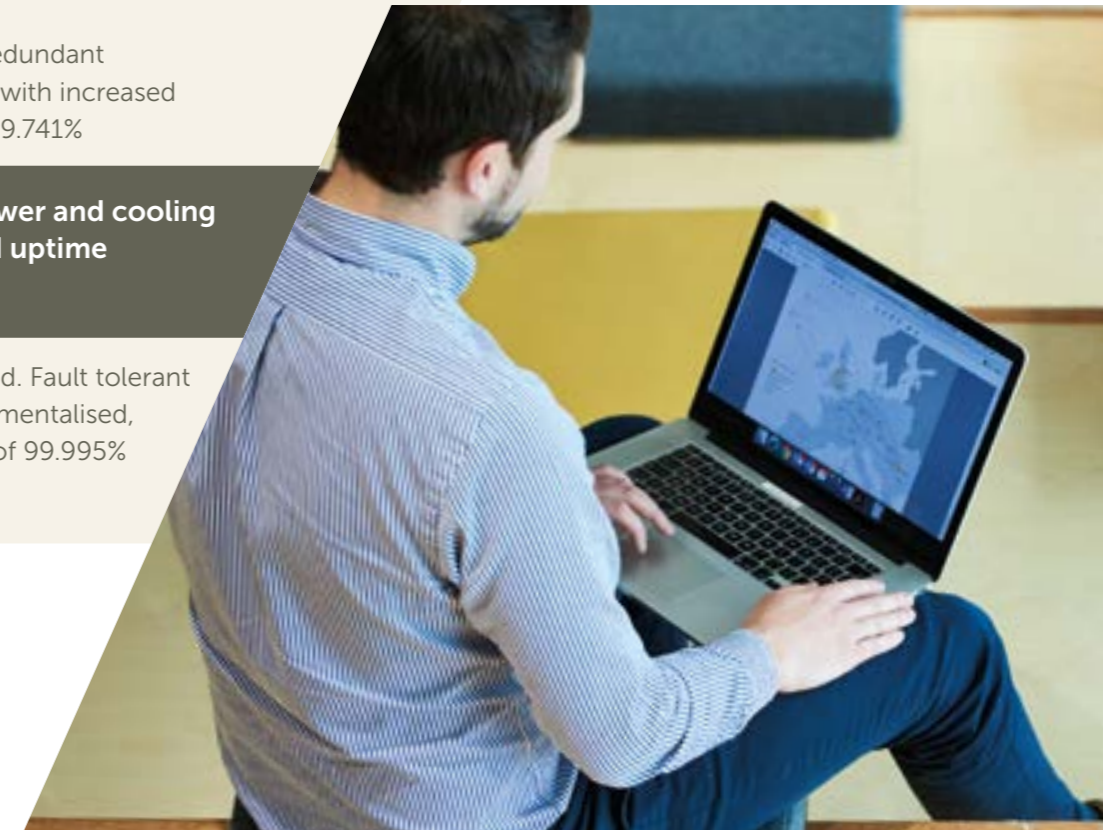

Tiered Hosting

Tier 1: No redundancy, and guaranteed reliability of 99.671%

Tier 2: Addition of redundant components with increased reliability of 99.741%

Tier 3: Multiple power and cooling sources and uptime of 99.982%

Tier 4: Dual-powered. Fault tolerant and compartmentalised, with uptime of 99.995%

Green Credentials

EFFICIENT DATACENTRES LEADING THE WAY

Environmentally friendly business practices are a priority for us.

Our state-of-the-art datacentres have set an example as one of Europe's greenest, and we constantly work to improve our PUE (Power Usage Efficiency). This has resulted in us saving around 1,000 tons of carbon dioxide per year – the equivalent of powering 150 homes.

1,000 tons
of Carbon Dioxide
saved per year

M247's portfolio of internationally enabled products encompasses everything from global MPLS Connectivity, Public and Private Cloud infrastructure and Hosting, to a suite of Security and Communication Services that enable you to operate your business at a truly globally integrated scale.
