

The Times they are a Changin'

The Search for Value Through Influence

Joel S. Gilbert, P.E.
President & CSO

Agenda for Today's Presentation:

- **Shifts in customer communications styles and needs**
- **Why customer engagement is now “table stakes”**
- **Fun look at some near term realities and risks**
- **How to move towards customer influence right now**
- **Deliver solid business results to give you some time**
- **You are not at the table now ... you are on the menu!**

Mid Cycle Alert Messaging

Rates must reflect Supply Agreements

- Electric providers generally no longer face spot markets
- Most face expensive demand charges with low energy charges
- Therefore most rate schedules are out of line with costs
- Many today moving to TOU and/or Demand Charges ... but
- Solar “Duck Curve” is now real and shifting peak demand time
- Demand was fairly predictable based upon weather forecasts
- Predicting Duck Curve impacts due to clouds will be problematic

WHAT DO CUSTOMERS WANT?

- DR? EFFICIENCY? ↙
- ↙ APPS? ONLINE PORTALS?
- USE INFO? STATS? ↙
- ↙ RELIABILITY?
- OUTAGE INFORMATION?
- TO BE LEFT ALONE?

HERE, PULL MY HOOF.

Gas Cost: \$3.00

Where to start? Explaining the bill works best!

High HVAC Detected in Analysis

Based upon your last year of energy bills, it appears that this (xx%) percent of your bill is for heating and cooling. Please click on the link below to our Energy Advisor to profile your home so we can refine our analysis and find specific ways to save you money.

Upon completion of the home profile, you will see a detailed report of your energy costs by type of appliance and a list of dollarized savings recommendations, some of which may have rebates associated with them.

[Energy Advisor](#)

Analyzed 500,000 billing histories

Applied public records information

Detected home characteristics

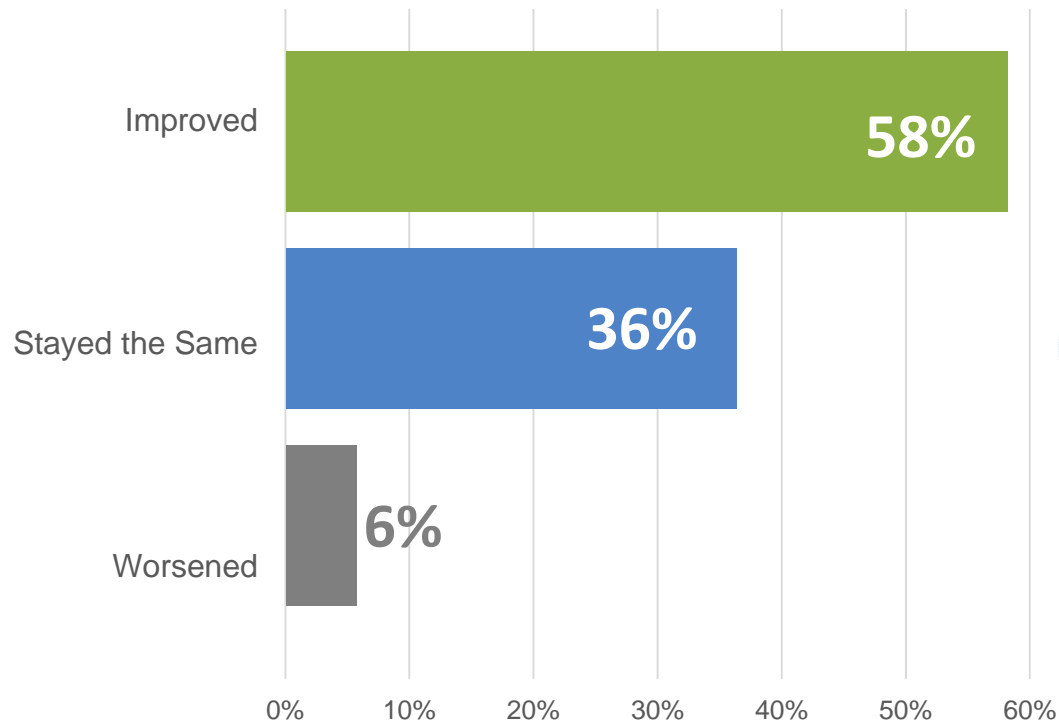

Targeted specific households

Tested several message contents

Clear winner was explain the bill

Video Bill Explanation is clearly Today's Killer App!

After watching this video, your perception of Xcel Energy ...

- Perceived as **personalized**, about your bill
- About **10x more improved** (58%) vs. worsened (6%)

“What a great personalized way to understand changes in my bill. I like that fact that it was proactive and narrowing where the changes were in the bill.”

“It was interesting to see what affects the bill.”

It was very helpful to understand my energy use.”

I didn't know some billing periods were longer than others.”

Bill Explanation – Usefulness

How useful was the information presented?

- **88%** said very or somewhat useful
- Personalization - **30% more** very useful responses
- **5x** very useful vs not very or not at all

“I liked that it gave specific information about the changes in the last month and what they specifically cost or save me.”

Extraordinary results: **98%** want them regularly.

15% Reduction in Calls to the Call Center!!
Monetize that for your situation!

But we still have a ways to go!

Customer Engagement & Expectations are Changing!

- Mobile has just surpassed desktop
- Keyboarding is now mostly social media IMHO
- **Voice assistants about to surpass keyboarding**
- Energy Companies interested in “Connected Home”
- But rear view mirror POV clouds perspectives
- Forrester and Parks Associates gives us insights
- **But, watch the renewed interest in climate change ...**

Not all Customers are Text Savvy either

Gartner's POV on the Connected Home

Networking: Familiar home networking technologies (high bandwidth/high power consumption), such as Multimedia over Coax Alliance (MoCA), Ethernet, Wi-Fi, Bluetooth, as well as 3G and Long Term Evolution (LTE), are complemented with low-power consumption networking standards for devices and sensors that require low bandwidth and consume very little power, such as thermostats.

Media and Entertainment: This category, which covers integrated entertainment systems within the household and includes accessing and sharing digital content across different devices, has proved to be the most prolific and contains some of the most mature technologies in the connected home.

Home Security/Monitoring and Home Automation: The technologies in this category cover a variety of services that focus on monitoring and protecting the home as well as the remote and automated control of doors, windows, blinds and locks, heating/air conditioning, lighting and home appliances, and more.

Energy Management: This category is tightly linked to smart cities and government initiatives, yet consumer services and devices/apps are being introduced at mass-market prices that allow people to track, control and monitor their gas/electricity consumption.

Healthcare, Fitness and Wellness: Solutions and services around healthcare have proven slow to take off, because they have to be positioned within a health plan and sold to hospitals and health insurance companies. The fitness and wellness segment has strong and quickly developed ecosystems that range from devices to sports wares to apps, which integrate seamlessly with each other to create a strong customer experience.

I can't wait to look at my smart grid data!

Industry declares success on bad business cases

I can be unloading groceries from the grocery store, look at the monitor and open the refrigerator door and watch the (power usage) number go up.
It's a real good learning tool for me.

Your Trusted Partner in Customer Engagement

Engagement is Table Stakes not differentiator:

*More and more utilities are using voice as an engagement channel, Google's Hamel agreed. But the ongoing challenge for incumbent utilities is to make clear **their relevance** to their customers.*

Jeff Hamel

Director, Global Energy and Enterprise
Partnerships at Google

Mountain View, California | Internet

Key Takeaway according to Google

“48% of those who own a voice activated speaker want personalized tips and information to make their lives easier!”

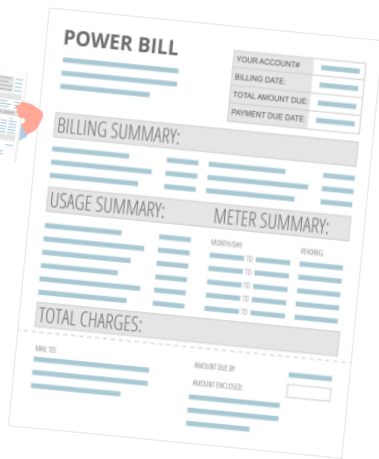

Once again ... start by explaining their bills and tell them what they can do about them.

Bill Explanation & Forecast
Mid Cycle Alert Messaging

Wise words from the late Steve Jobs ...

“For something this complicated, it’s really hard to design products by focus groups. A lot of times, people don’t know what they want until you show it to them.”

“Innovation has nothing to do with how many R&D dollars you have. When Apple came up with the Mac, IBM was spending at least 100 times more on R&D. It’s not about money. It’s about the people you have, how they’re led, and how much they get it.”

Key Takeaways from the webinar Today:

- **Customers no longer read or write: use video messaging**
 - **They want to know you care: message new rates carefully**
 - **They want to be comfortable: offer ideas and technology**
 - **They want a sense of control: offer daily bill forecasts**
- **Personalized high bill video explanations reduce calls by 15%**
- **Work with early adopters to use smart speakers with relevance**
- **Remember, if you are not at the table, you are on the menu!**
