

Job Description

An engineering company which specialises in the manufacturing of bespoke stainless steel conveyor systems for the food industry, Ambit Engineering Projects is part of the ENE Group which consists of ENE Conveyor Systems, ENE Conveyor Belting, Sovereign Labelling Machines and Ambit Engineering Projects. Ambit and ENE prides itself on its innovative engineering and dedicated customer service.

Due to expansion and increased sales, we are seeking a Welder/Fabricator to join our rapidly growing team. This is an exciting and rewarding role for an individual with ambition and a drive for improvement through design.

Main Duties

- Welding and fabricating steel components for food manufacturing equipment from start to finish.
- Working from drawings to ensure highest level of quality within your work to meet client specifications.
- Following all health & safety SOPs to ensure a safe working environment
- Managing workload and working to deadlines to ensure all projects are completed in full and on time

Experience Required

- Stainless steel welding experience
- Experience in working off engineering drawings
- Experience of site installations
- Time management and organisational skills

Rewards

- Competitive rates of pay
- Overtime available
