

PLEASE REVIEW WITH ALL PATIENTS REFERRED TO LANE REGENERON INFUSION CLINIC

Be on the lookout for a phone call from the infusion center!

The medication works best when it is given as soon as possible, so if you are unable to answer when the infusion center calls to make your appointment it is important to call back right away. Find out the visitation policy.

To help prevent the spread of COVID-19 infections, many sites are unable to allow visitors at this time. Ask your infusion site before planning to have a friend or family member stay with you during your treatment. Start drinking extra fluids like water prior to your appointment.

Staying hydrated can help make your veins more easily accessible. If you have been told to limit how much you drink due to another medical condition, check with your healthcare provider before drinking extra fluids.

Infusion Day Tips

Start your day as usual.

No special preparation is needed before your infusion. Eat a nutritious breakfast, stay well hydrated, and take your usual daily home medications. Wear comfortable clothing and be sure your shirt sleeves can be rolled up to allow access to your arms (and veins!).

Some people feel chilly during their infusion because the medication is cooler than your body temperature. Dressing in loose layers and warm socks can help. Bring something to keep your mind busy.

Reading a book, doing a crossword puzzle, or playing games on your tablet will help pass the time much faster than watching the clock. Wear a mask! Treatments take between 30 to 50 minutes and require observation of up to an hour afterwards.

You will be asked to wear a mask over your nose and mouth when you are around other people to help stop the spread of COVID-19.

Questions? Please call Lane Regeneron Infusion Center at 225-658-4025.

**Lane Regeneron Infusion Center is located at 6550 Main Street, Zachary,
on the 3rd floor of the Lane Medical Plaza & Outpatient Diagnostic Center.**
