Functional, high-quality, and environmentally friendly paper cards

AN ENVIRONMENTALLY FRIENDLY ALTERNATIVE TO PVC

The paper cards are an environmentally friendly alternative to PVC cards for short-term use (from a few hours to a few days), or where there is minimum handling. The cards are suitable for a wide range of applications.

RESPECT FOR THE ENVIRONMENT

The cards are made from FSC (Forest Stewardship Council) paper, which comes from sustainably managed forests. At the end of their life, the paper cards are biodegradable and compostable. They can be disposed of in recycling bins.

QUALITY GUARANTEE

Tested and validated by Evolis's R&D and Quality departments, paper cards offer high-quality monochrome rendering to a professional standard.

A GLOBAL ENVIRONMENTAL APPROACH

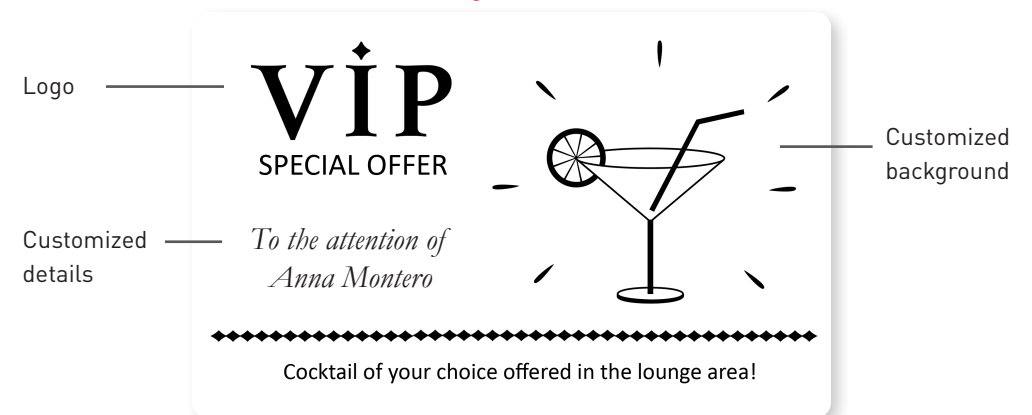

Aware of the environmental challenges, the Evolis Group works hard to limit its ecological footprint across every activity:

- Eco-design of printers based on life-cycle analyses
- Optimization of energy efficiency at the production site
- Reduction, sorting and recycling of waste
- Encouraging good practice among employees

CHOOSE YOUR DESIGN

Paper cards provide plenty of customization and printing options. The Edikio card creation software lets you create and print all the badges and cards you need.
