

PMC OUNCE®

The Investable Product Matching the Composition and Weighting of the PMC Index®

Physical Bullion Asset Leveraging the Benefits of a Diversified Precious Metals Portfolio

The PMC Ounce (Precious Metals Composite) is a dynamic physical precious investment asset that provides the same diversified and weighted allocation of precious metals that comprise the PMC Index®. The PMC Ounce trades in real time and allows an investor to capture and combine the value associated with each metal's time tested characteristics as a store of wealth, inflation hedge, currency hedge, and unique industrial applications.

- Gold
- Silver
- Platinum
- Palladium

KEY BENEFITS

DEAL DIRECT WITH THE EXCHANGE

Neptune-GBX makes and maintains a live two-way market, buying and selling.

INNOVATION

Awarded a US Patent as an innovative physical precious metals investment.

LIQUID AND DIVISIBLE

Turnkey physical bullion investment that is highly liquid and divisible.

DESIGNED TO PERFORM

Superior investment asset via diversification through a unique single product with a diverse and intelligently weighted physical composition.

TRANSPARENCY

PMC Ounce pricing is fully transparent and moves by the same real-time changes as the underlying metals that comprise it.

ONLINE CLIENT PORTAL

Neptune's clients are provided access to its online portal. The client portal tracks and reports investment positions, real-time account valuations, and transaction history along with other valuable information and tools which empower clients.

PMC OUNCE®

100% BULLION BACKED

Each PMC Ounce is backed 100% with fully allocated physical gold, silver, platinum, and palladium bullion. The metals are stored on an insured basis at a non-bank bullion depository and ownership is proportionally assigned in the investor's name.

BETTER RISK-ADJUSTED RETURN

The diversification and weighting of the PMC Ounce is architected to seek a superior risk adjusted return compared to a position in one or two of the component metals, such as gold and/or silver.

IRA APPROVED

Regular IRA, Roth, SEP, and 401k Rollovers.

INSURED NEPTUNE VAULT ACCOUNTS® - PMC OUNCE, GOLD AND SILVER

Neptune Global's Vault Accounts® lead the precious metals investment world as the most innovative, efficient, and option-rich way to own and trade physical precious metals. Vault Accounts give investors the ability to own and trade physical precious metals with the same ease as trading a stock or ETF, yet there is no financial instrument between the investor and underlying asset, thereby mitigating the counterparty risk associated with an exchange traded product or fund.

MITIGATES COUNTERPARTY RISK

The PMC Ounce is backed 100% by fully allocated physical bullion from refineries designated "Good Delivery." The 100% physical backing of the PMC Ounce in conjunction with investor ownership recorded at the depository level mitigates the counterparty risk generally associated with exchange traded products, funds, and derivatives.

ACCOUNT HOLDER VERIFICATION

Verification of the investor's bullion holdings are provided to the account holder directly from the depository, an entity independent from Neptune Global.

APPROACHABLE PRICING & MINIMUMS

Trade prices for the PMC Ounce, Gold Vault Account, and Silver Vault Account are in real-time and posted live. Modest account size minimums for individual investors, wealth managers, broker/dealers, family offices, and institutional investors apply. Contact Neptune Global for more information.

LIQUID, DIVISIBLE, EASY TO BUY, SELL, AND HOLD

Ideal investment vehicle for investors with various goals, objectives, and holding periods. The efficiency and dynamics of the PMC Ounce, Neptune Gold Vault Account and Neptune Silver Vault Account empowers investors in a manner far superior to alternative offerings in the precious metals market.
