SMART

Are visual highlights and contemporary hygiene concepts mutually exclusive? The answer is a clear NO. The four new decors of the Smart collection are dishwasher-safe and their surfaces are just as resilient as those of undecorated tableware. The combination of decor and coloured glazes brings magical variety to the table – without having to invest in a multitude of different pieces.

The new concept for smart shoppers – German hard porcelain at attractive prices.

The new, intelligently composed, lines of the Bauscher Smart collection are ideal for the presentation and serving of contemporary foods and beverages.

White porcelain with a timeless formal vocabulary or attractive decors with a hip, coupe look – all pieces come in professional quality with the Made in Germany seal and are in stock for immediate delivery.

The very smooth and non-stick, glazed surfaces of the new Smart pieces are a guarantee not only for a long service life, but also, and above all, for easy cleaning. Thanks to its low porosity, hard porcelain prevents germs and bacteria hiding away in surface pores. After all, besides outstanding tableware design, compliance with hygiene standards is now more important than ever before.
