Visual Basic Upgrade Companion Version 9.1 Release Notes
.NET 5 Support

This release of VBUC includes numerous small but important improvements and bug fixes, particularly in the area of helper classes for database migrations (including ADO and RDO), and improvements in the following areas:

- Support for new error handling patterns.
- Default property expansion in VB6 types that have a default property of the same type.
- Control Array events migrations.
- Elements renaming mechanism.
- Stub generation mechanism.
- Properties migrations via comInterop.
- OLE_COLOR migration.
- MSFlexGrid, VSFlexGrid mappings.
- DataCombo mappings.
- TrueDBGrid mappings.
- ClassInitialize and ClassTerminate methods support.
- Type Libraries Inventory loading mechanism.
- GUI bug fixes.
