

Product Designer – Qbtech

Would you like to take part in transforming healthcare? Qbtech is the global market leader in professional ADHD tests, providing tests that are both CE marked and FDA cleared for use as an aid in the assessment and treatment evaluation of ADHD for people age 6-60. Our vision is to transform healthcare by providing a complete system of leading objective tests, products and services that empowers clinical and financial decision-makers to improve outcomes and support patients to better understand their symptoms and treatment.

Qbtech is present in 14 countries with offices in Stockholm, London and Houston. Over the next years, Qbtech will make significant investments into new products, technologies and people to further strengthen their services and product offerings with the aim of building an ecosystem with solutions for providers, clinicians and patients. The tech team is the main focus of these investments.

About the role

This role will work across the existing web products and a brand new mobile application and help improve/define the complete user experience on them. The user of these products is highly sensitive to the UX & UI experience and therefore an extremely high importance is placed on this aspect.

You are:

- Passionate about building beautiful and highly intuitive Product designs
- An experienced UX Designer / Product Designer with a track record of building exciting web based or mobile application products or both
- Able to empathize with the end user and anticipating their needs. Be a “voice of customer”
- A practitioner of modern UX/UI/design practices

You will:

- Work closely with the Product Engineering team, Sales and Management
- Own and define the user experience across the portfolio
- Work with SCRUM / Agile processes and represent the Product design agenda
- Maintain Product collaterals related to UX/UI of the products
- Conduct user research, usability studies using effective research methods
- Use ideation techniques to come up with the best UX idea that solves real user needs
- Test the feasibility of the ideas with stakeholders
- Come up with wireframe designs, mock-ups, prototype sketches to illustrate ideas
- Run real world tests and document findings in a report
- Inputs on visual design elements and translating UX ideas into great UI

What can Qbtech offer you?
