

Zero-emission Reefer Trailers from the Industry Leaders.

eNow has developed the most reliable all-electric, zero-emission refrigerated trailers available.

Our comprehensive solution includes:

- eNow's battery power system with multiple power options — solar, hybrid and shorepower — coupled with an advanced power storage system.
- Your choice of reefer trailers from the top OEMs — Great Dane, Hyundai, Utility, Vanguard or Wabash.
- Carrier's Vector Series electric and hybrid reefers — number one in the industry.
- Charging infrastructure to meet your fleet specs and provide reliable performance under all conditions.

Reduce reefer fleet operating costs by 30-50% .

eNow's all-electric reefer solution can cut fleet operating costs up to half compared to traditional diesel reefers. They also have an asset life of 10-12 years. Ask to see a cost comparison for your fleet's application.

Comparative Cost Savings: Diesel-only vs. eNow Zero-Emission Trailer

DATA SUMMARY	Diesel Only	eNow Zero-Emission Trailer
Initial Investment	\$100,000	\$100,000
Operating Costs	\$100,000	\$60,000
Total Cost of Ownership	\$200,000	\$160,000
Cost Savings		\$40,000 (20%)

Substantial Federal and State incentives are available!

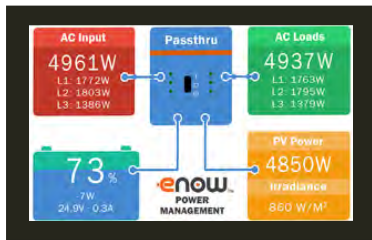

Your fleet may receive Federal and State voucher incentives to cover much of your new equipment costs. eNow can assist in the application process.

POWERING POSSIBILITIES
ENOWENERGY.COM

The eNow Rayfrigeration™ Trailer System

1 eNow Battery Power System

- eNow's flexible system offers multiple reefer power options including solar, hybrid, and shorepower — coupled with a high-performance energy storage.
- Patented, advanced design delivers reliable power for most TRU applications.
- Best-in-class components include high-performance solar modules, lithium-ion batteries, charge controllers, power inverters and protective enclosures.
- Monitoring unit includes: a CANBus based, touch-screen diagnostic/monitoring system

2 Customer-Specified Trailers

- eNow's Rayfrigeration™ systems can be installed on new reefer trailers from the top five OEMs: Great Dane, Hyundai, Utility, Vanguard and Wabash National.
- Customers select reefer trailers with the best combination of features to fit their specifications and budget.
- eNow installs all systems and delivers complete reefer trailers to customer.

3 Carrier Vector™ Reefers

- The industry's leading electric reefer units eliminate or reduce emissions and fuel consumption of traditional diesel TRUs.
- Environmentally sustainable, lower carbon footprint — a quiet solution for operations in residential areas.
- Orbcam data collection and temperature management, maintenance, and logistics.

4 eTRU Charging Infrastructure

- Battery charging stations are proven and extra rugged.
- Constructed of robust powder-coated stainless steel to perform in harsh outdoor conditions for years.
- All provide easy access to 208VAC – 480VAC corded connectors for refrigerated trailer electric standby.
