

Electric Mini Superflat Screed TS6100e

World first fully electric screed setting new standards in environmental protection compliance. Equipped with state-of-the-art automatic laser system for laying flatter concrete floor slabs.

Driving innovation in construction ecology

Main advantages

Zero Emissions.

Automatic laser control system.

Increased daily productivity.

Improved concrete flatness.

Reduced unskilled manual labour.

Lightweight to drive on mesh & cold-store insulation.

Technical description

Specifications	
Width with screed	2872mm
Width without screed	990mm
Length	2675mm
Height with mast	1968mm
Weight	830 Kg
Battery	48V
Power	19.2kw
Charging time 220V 16A	5-7H
Charging time 380V 16A	2-4H
Remote Control	Yes

Transport Mode	
Transport racking	Yes
Length	1950mm
Width	995mm
Height	400mm

Software	
SFS 3.0	Yes
Language standard	English - French- Spanish- German- Portuguese- Russian
Optional Language	On demand
