

## Foundation Training in Botox and Dermal Fillers

### Training Session

Please ensure you have revised your pre-learning module.

Prior to your training appointment, you should choose a suitable patient for:

**Three area botulinum toxin of the glabella complex (frown), frontalis (forehead) and periorbital region (crow's feet)**

or

**Dermal filler treatment (1ml of Juvederm Vycross) of the cheeks, lips or nasolabial fold**

You are required to carry out a thorough consultation with your patient prior to attending the appointment and agree a treatment plan. Please ensure you have:

- Taken a thorough history
- Discussed your patients' ideas, concerns and expectations
- Assessed your patient's suitability for treatment
- Discussed potential side effects and complications
- Discussed the price of treatment with your patient

Please bring along the completed consultation template on the subsequent pages of this document. Written consent will be gained during the appointment.

*Please note, if your patient is unsuitable for treatment on the day, we will be unable to proceed with the Training Appointment.*

## On the Day

Your patient must arrive 10 minutes before your allocated appointment.

### **The Academy Clinic will provide:**

- Insurance for the treatment
- All consumables
- Clinical photography

Please wear attire suitable for a professional clinical environment.

## After the Session

Aftercare and subsequent review of your patient will be your responsibility; however, you are welcome to contact us for advice.

## Consultation for Training Appointments
