

ACCIDENTS HAPPEN

Be prepared for the unexpected with
Bloodborne Pathogens Kits

EZ-Cleans Plus® Kit *(3 year shelf life)*

Includes personal protection items for the clean-up of blood or body fluid spills. Encapsulating and containing potentially infectious spills helps reduce employee exposure to infectious waste, as well as possible cross-contamination.

Each kit contains:

- Pair of Vinyl Gloves
- Paper Towel
- 10 g. Red Z® Solidifier
- Red Biohazard Bag
- Scoop/Scraper
- Twist Tie
- p.a.w.s.® Antimicrobial Hand Wipe
- Instructions
- SaniZide Pro 1® Wipe

Kit Accessories

Red Biohazard Disposable Bags

Our Red Biohazard Bags come in two sizes and are used in hospitals, offices, labs, nursing homes, clinics, emergency rooms and other medical facilities. All Red Biohazard Bags are clearly labeled with the Biohazard emblem in both English and Spanish.

***Please follow your local, state and federal guidelines when disposing of potentially hazardous waste products**

Item#	Description	Case Qty.
2110105	Red Biohazard Bag (33" x 39")	150/case
2110122	Red Biohazard Bag (24" x 24")	500/case

Protective Gown

Unisex, fluid-impervious closed-back gown shields and/or guards the wearer from potentially infectious or harmful substances. Federal and state states govern the use of such apparel.

Latex-Free

Gown Size: Large

Item#	Description	Case Qty.
2410062	Protective Gown	50/case

Scoop and Scraper

The scoop and scraper are attached with a perforated section to easily break apart and begin use. Once the spill has been collected and scraped into the scoop, it should be disposed of in the proper receptacle or bio hazard bag.

Spill Cleanup Solidifiers

Safely handle a variety of spills within your facility using these Safetec® Solidifiers

Red Z® Solidifier (contains chlorine)

Solidifies potentially infectious blood, and body fluids

Sprinkle Red Z® evenly over the spill. Allow sufficient time for solidification. Remove solidified material with scoop and scraper. Clean and disinfect contaminated area after use and wash thoroughly.**

Green-Z® Solidifier

Solidifies potentially infectious blood, body fluids and chemical spills

Sprinkle Green-Z® to surround and evenly distribute over the spill. Allow sufficient time for solidification. Remove solidified material with scoop and scraper. Clean and disinfect contaminated area after use and wash thoroughly.**

Alky® Solidifier

Rapidly neutralizes and solidifies high pH spills

Ammonium Hydroxide, Sodium Hydroxide, Potassium Hydroxide

Sprinkle Alky® directly onto the spill, covering it completely. The spill will turn blue, then yellow when it has safely neutralized. Once it becomes a semi-solid gel, it is ready for cleanup with a scoop and scraper.**

Acid Lock® Solidifier

Rapidly neutralizes and solidifies low pH spills

Acetic acid, Hydrochloric acid, Nitric acid, Sulfuric acid

Sprinkle Acid Lock® directly onto the spill, covering it completely. The spill will turn pink, then yellow when it has safely neutralized. Once it becomes a semi-solid gel, it is ready for cleanup with a scoop and scraper.**

Petro Lock Solidifier

Rapidly absorbs petroleum-based spills

Gasoline, Solvents, Crude Oil, Paint Sludge

Sprinkle Petro Lock directly onto the spill, covering it completely to easily absorb fluid. Once it becomes a semi-solid gel, it is ready for cleanup with a scoop and scraper.**
(Petro Lock is oil specific and will not absorb water-based liquids)

*Meets D.O.T. 1713 hazardous discharge; EPA 263.30 immediate action and EPA 263.31 discharge clean up.

**Always wear protective clothing when cleaning up and/or handling a spill. Dispose of infectious and hazardous waste in accordance with all local, state and federal regulations. To watch a demonstration on how to use these products visit [safetec.com/resources](https://www.safetec.com/resources)
