Oreka Design Benefits

OrecX's modern and open audio capture platform creates strategic, technical, economic and collaborative benefits for businesses.

Modern

•Powered by the operating systems, databases, browsers and APIs that run the world's infrastructure
- Evergreen platform with no threat of technology obsolescence
- Unsurpassed speed to market
- Adapts to cloud, premise, and hybrid environments
- UI & REST API based on Google Angular framework

Open

•Founded on the principles of transparency, openness and collaboration
- Meets the broadest set of use cases
- Inter-operates with third party systems
- Run with common standard Rest API
- Unlimited ecosystem potential with third party solutions such as Speech Analytics, Voice Biometrics, AI, CX, and DX

Modular

•Components-based design for unmatched flexibility
- Scales from 10 to 100,000s
- Promotes rapid iteration and ecosystem building
- Economically efficient

Quality and Access

- Extensive peer reviews, iterations and enhancements from global user community
    - Widest array of supported high fidelity audio capture methods
    - Extends platform value with no arbitrary restrictions on system data

Control

- REST API for full application/system control
    - Flexible media storage – cloud, premise, hybrid
    - Complete access to your data in either real-time or post-call
    - Manage application via OrecX UI or utilize REST API for third-party control (CRM/Analytics, etc.)
    - Perform long-term strategic planning with confidence
