

Accessible Features:

- Allows users to tab through buttons and images
- Includes screen reading capabilities (user must have an active screen reader)
- Provide alt-text for every scene with visual descriptors

Accessibility with every tour

Built with accessible features for individuals with disabilities or impairments

Panoskin virtual tours are equipped with an accessibility feature, so everyone can take a virtual tour. Users simply tab to toggle on or off the accessibility tool, complete with screen reading and keyboard navigation.

Panoskin by LCP360 consistently receives a 98-100% accessibility score from Google Lighthouse, a tool that audits for web app performance and accessibility.
