

**SAFETY
FIRST**

Improve Safety and Communications in Healthcare

Keep people safe at your healthcare facility and reduce your risks by choosing the best infection-control technology by US-based PDi. Together we can combat these new challenges.

PRIORITIZE SAFETY AND SECURITY AT YOUR FACILITY

Studies suggest the most likely initial symptom of COVID-19 is fever¹. Do you do 100s of temperature screenings per day?

- Maintain safe social distance
- Replace screeners with tablet technology

The **PDi-TK8 Temperature Scanner** automatically measures temperatures of people, and can interface with employee databases or door access controls.

PDi-TK8, 8" LCD, Thermal Camera Temperature Scanner

NOTE: Temperature Screenings are designed to Detect Fever, yet this device Does Not provide a medical diagnosis.

BRING VIRTUAL VISITS TO YOUR COMMUNITY

PDi-TC16, 16" Touchscreen Telemedicine and Video Call Cart System Available 16" and 19" displays

Adjust the way you safely deliver care and communications, go virtual. Bring care anywhere.

- Protect healthcare providers
- Solve loneliness in Senior Living residents
- Minimize the number of visitors to your facility

CHOOSE BLEACH-CLEANABLE DEVICES, NOT CONSUMER PRODUCTS

MEDTAB14, 14" Arm-mounted Touchscreen Entertainment Systems Available 14", 16" and 19" displays

Do you ever wonder...Are iPads really safe for patients to share?

- Choose **medTAB®** by PDi
- Trust the only US manufacturer of UL-Listed, healthcare-grade devices
- Proven for patient safety

LET US HELP YOU DO WHAT IS RIGHT
