

Precision Industries

# WHERE THE ACTION IS

With 50 years of Contract Manufacturing experience, Precision Industries (PI) has the experienced workforce to meet your unique needs for quality parts. Located in southwestern Ohio, PI builds precision parts for many industries and is skilled at industrial engineering, prototyping, testing, just-in-time production and delivery, as well as continuous control of quality.

## INDUSTRIES WE SERVE:

Healthcare

Banking

Food Services

Automotive

CALL TODAY 937-550-2865

### CNC Mills

3 axis with rotary table

### CNC Lathes

plastic and metal capability

### CNC Turret Punch

### Four Post Presses

up to 200 tons

### 4 Axis Press Brake

### 10 foot Hydraulic Shear

Steel

Stainless Steel

Brass

Aluminum

## Metal Fabrication Capabilities

PI excels in full metal fabrication capabilities for cutting, milling, turning, punching, pressing, and bending multiple materials including steel, stainless steel, aluminum, and brass.

- CNC mills – 3 axis with rotary table
- CNC lathes – plastic and metal capability
- CNC turret punch
- Four post presses up to 200 tons
- 4 axis press brake
- 10 foot hydraulic shear

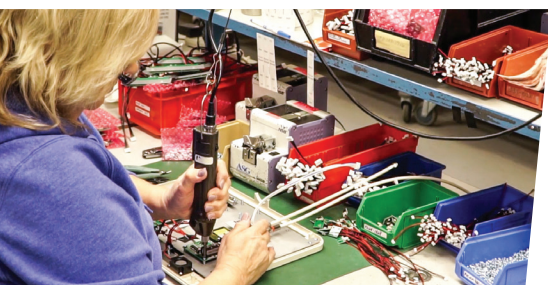

### PI has additional services for metal parts including:

- Robotic welding
- Manual welding
- PEM fastener insertion
- Time Saver finishing machine

## Powder Coat

PI can powder coat components up to 40" wide and 40" tall. We stock several colors of powder, some with antimicrobial properties.

## Assembly

PI can provide both electronic assembly and mechanical assembly. Our electronic assembly line is ESD protected and has a negative pressure assembly hood.

## QUALITY

PI is ISO9001:2015 certified. Our quality standards are driven by customer requirements. We are proud to continually meet or exceed customer expectations. Quality is one of our core values. We focus on a thorough inspection with a CMM each time a part is setup, and several times daily while the part is run.
