

Introducing Libryo Answers

The ruthless elimination of inefficiency is here

Libryo Answers is built on Libryo's global regulatory tracking platform for in-house lawyers to know the answers to legal questions faced worldwide.

Answers for anywhere

Simply set your questions, check which jurisdictions you need answers for and assign a lawyer to answer each one.

Assign the best

Assign lawyers within your team, panel lawyers that you already work with, or choose from our directory of expert lawyers to assist you.

Answers that do not go out of date...

You and your lawyer are notified when updates are made to the original regulation, so answers can be continually updated and action taken whenever needed.

...and answers that never get lost

The problem of "where is that email?" is a thing of the past. Libryo Answers is a knowledge management platform that saves everything in one place.
