

Professional Services

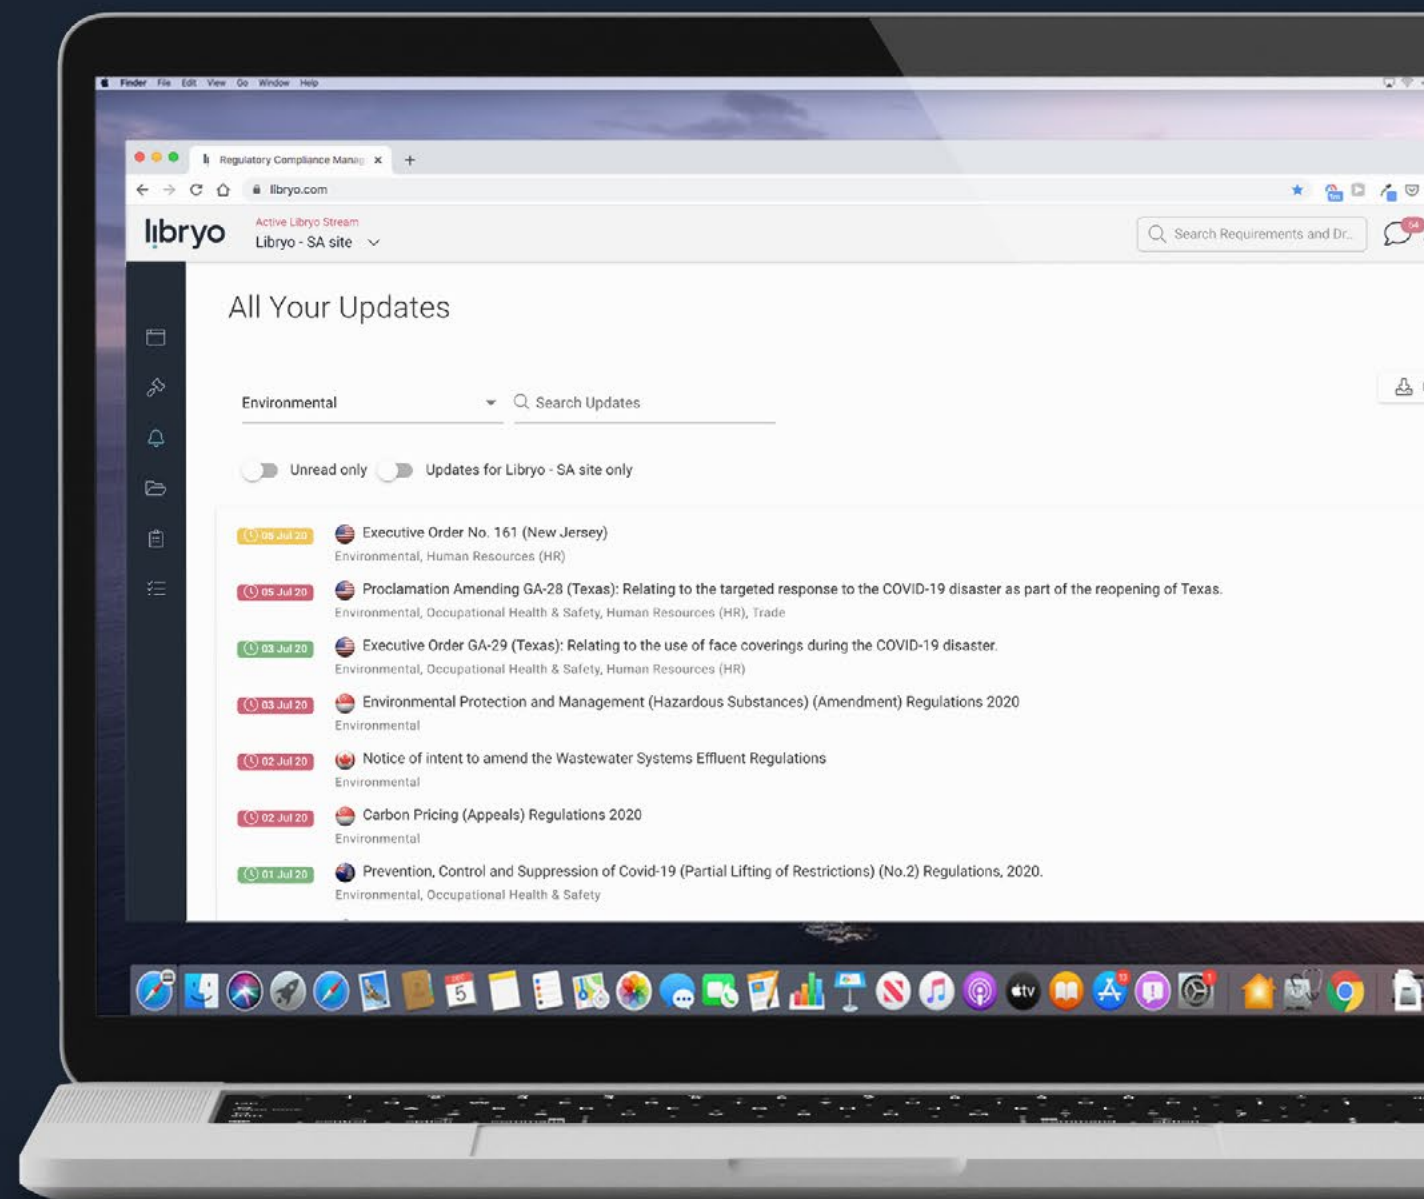

Professional Services designed for end-to-end compliance

Libryo's professional services support risk, legal and compliance departments with EHS training, auditing, obligations management and more.

libryo.com

*Thousands of regulations.
Hundreds of obligations.
One platform.*

Stay on top of your legal requirements, understand your obligations and show your compliance using Libryo's simple solution.

Site-specific audits

We can complete traditional on-site, remote, or area-specific audits. These audits will provide you with the assurance that your organization is compliant with its applicable EHS legislation and identify where any gaps may occur. We can also include permit reviews.

Site-specific compilation of Libryo Streams

Libryo's legal compliance solution compiles a customized legal register applicable to an individual site - we call these Libryo Streams. Each Libryo Stream will consider your location, business activities and jurisdiction per operation. Every Libryo Stream is automatically updated and can be set up with the help of our professional services team.

Self-assessment coaching

If you already complete self-assessments using the Libryo Assess Module, or would like to, Libryo's professional services team are on hand to provide you with guidance and support. Once completed, we can also perform a remote verification of your self-assessment, and keep all of this updated.

Linking operational risks to legislation (for limited countries)

The Libryo team will help to identify your risks, ensure that you understand them and link these directly to your relevant legislation - keeping everything logged in one platform for future audits and risk assessments.

Platform training and support

Our team will help you gain maximum value from your solution. Working with local and global users, our platform training ensures that your team fully understands how to navigate the platform, what their regulatory obligations are and how to maintain overall compliance.

Compliance training courses

Online compliance training courses can be given to an organization, department or set of users. We can customize these courses for an individual site or for global teams, and base these on your applicability of the law. The training is interactive and contributes to CPD points.

Courses include:

- Risk assessment training
- IMS training (combined training for ISO 9001, 14001 and 45001)
- Legal awareness training:
 - For Occupational, Health & Safety
 - For Environmental, Health & Safety
