# A compass for navigating regulatory compliance

Maximize your Compliance Ecosystem
by Integrating a Digital Legal Library

ISOMETRIX
Good Business

Keeping up-to-date with legal changes across multiple jurisdictions and international boundaries is a challenge for even the world's biggest businesses.

Reporting on your compliance status is time consuming and nearly impossible to do accurately with manual and spreadsheet-based systems.

How do you keep track of only the regulations that matter to your business, and how do you ensure individual sites remain compliant?

"Monetary losses resulting from non-compliance are 2.7 times more than the average cost of meeting compliance requirements"

*Globalscape -*
*The True Cost of Compliance*

**Stay compliant to avoid:**

- Fines
- Penalties
- Productivity losses
- Reputational damage

The most efficient way to do this is by integrating a dynamic regulatory content into your digital risk management system.

This protects organizations from costly fines, lawsuits and lost productivity resulting from non-compliance, which can have long-term and sometimes devastating impacts on a business.

In other words, to navigate the dynamic legal landscape, you need a compliance compass. That is, you need to know where you are and where you are going, at all times.

IsoMetrix and Libryo, both leaders in their respective fields of risk and compliance, have joined forces to develop a technology solution that empowers risk, legal and compliance experts and leaders like never before.

With our combined solution, compliance professionals will:

- Know exactly **which regulations apply to which sites** – at a glance

- Know **how to comply** with these regulations

- Have the means to **track and measure compliance**

# Benefits of a real-time data solution

The unified IsoMetrix and Libryo legal compliance system enables professionals to keep track of ever-changing regulations. The automated notification system keeps you informed of all your relevant legal updates and changes in real-time.

- Improve your compliance through tracking and monitoring the laws applicable to your business

- Make informed decisions fast, with easy access to relevant information

- Drive sustainability and focus on what matters by reducing the time spent monitoring legal updates

- View your compliance status at a glance using real-time dashboards

# The Integrated Compliance Solution: *How it works*

Comprehensively manage your compliance ecosystem as a single source of truth for your regulatory requirements.

Based on the attributes of each location, Libryo filters the relevant law, enabling you to know your site-specific regulations and compliance status. Data based on your location and context is passed over into the

IsoMetrix platform, and the software continues to check for updates to your regulations.

This data is deployed to the IsoMetrix Compliance Maintenance modules. The integration of this information onto a single platform allows the compliance module to monitor actions and track activities by using one system.

When a regulation changes, Libryo notifies the relevant users both on the platform and via email, presenting the update in a quick summary or the full legislative text. Users are able to mark these updates as read and understood, ensuring everyone that needs to be aware of the change is updated and knows the next steps to take in order to remain compliant.
# From Place to Compliance

**libryo**

**ISOMETRIX**

Gather context specific information about your business such as location, industry and activities.

Libryo compiles a site-specific legal register tailored to your context and tracks your relevant regulations for updates.

The information is integrated into IsoMetrix.

IsoMetrix manages the entire workflow from legal obligation through to risk compliance and reporting.

Compliance is ensured and audit trail available.

# Case Study

Read how Omnia, a leading multinational agriculture, mining and chemicals company manages 687 laws across 44 of their operational sites globally with the IsoMetrix and Libryo solution.
