CLOUDEON

DIGITAL SERVICES

Your fast-track from business idea to product.
Dream – Design – Develop - Drive

Focus on business outcome

You want to keep your competitive edge, and have the ability to respond faster to threats from current competitors and new rivals driven by digital business models.

Digital business requires speed and agility which Cloud-computing provides through the use of Cloud-services.

DIGITAL GARAGE enables you to explore your ideas, products or services and validate them with your customers to get a "hands-on" understanding whether it works or not and if it will meet customer expectations. This is the shortest path to understanding more about the viability of your idea.

If the experiment turns out to be promising, you are already one step in the right direction, if it does not turn out the way you wanted, you fail fast, and save a lot of valuable time and money.

DIGITAL FACTORY is a subscription for agile development and operation of software in the Cloud. It covers a full value chain from business idea to operations. Solutions are by design, secure, compliant, resilient, instrumented and self fixing which reduces operating cost. The Cloud-platform is scalable, flexible and offers a variety of ready-to-run services.

Sign-on, show up & start developing

You do not need to be expert in design thinking, agile, scrum or any other development methodology. We will enable your product owner to fit in and work with us, using agile methodologies and tools. You can focus on your business and leave all the construction and maintenance work to us.

Innovation Platform

Subscription for continuous innovation, development and operation. You will get capacity, competences, capabilities and processes to build, deploy, validate and learn.

KEY FEATURES

DIGITAL GARAGE
Explore new ideas and technologies, e.g. IoT, AI and Data analytics.

EXPLORE CLOUD DEVELOPMENT
Explore the Cloud viability of your legacy software.
Experience the power of agile software development in the Cloud.
Build a preto- or working prototype – all facilitated by our experts in the Digital Garage.

DIGITAL FACTORY
Subscribe to continuous agile development and operation of new services in the cloud. Access a full value chain from business idea to operations of the final service.

DIGITAL SERVICE ENABLEMENT
We establish a Cloud development environment and connected services in your Cloud tenant.
Utilize our Cloud capabilities to design, develop and build new and exiting services.

SERVICE DEVELOPMENT
Feature development preto/prototypes, maturing.
Fixed capacity, & "unlimited" competences & capabilities.
Your own core-team of Cloud Software Developers.
Full Azure development environment.

SERVICE HEALTHCARE
Refactoring to keep technical debt low.
Keeping services on par with Cloud platform (e.g. changing APIs).

SERVICE OPTIMISATION
Optimizing for Cloud-cost model.
Optimizing for new Cloud services.
