## Quality Verification Program

[eagleprotect.com/pages/delta-zero](https://eagleprotect.com/pages/delta-zero)

### SAFEGUARD WHAT MATTERS TO YOU

The Delta Zero™ verified badge certifies Eagle nitrile gloves have been thoroughly tested and passed stringent glove standards, adhering to the highest level of consistent glove safety and performance.

Third-party laboratory testing ensures the consistent quality and safety of Eagle glove's raw materials, and the absence of unsafe chemicals, toxins and microbial contaminants - areas that can pose a threat to multiple industries and glove user health.

The hidden risks of glove contamination result from the largely unregulated production and manufacturing of single-use gloves, with limited and infrequent glove compliance testing on import to the U.S.

Delta Zero's multi-layered proprietary glove testing\* is outlined below.

## 1 SAFE INGREDIENTS

The chemical signature of an Eagle glove raw material is tested to verify consistent premium quality "ingredients", & to ensure they do not contain potentially toxic chemicals which could impact glove safety and glove user health.

▶ **TESTS: Py-GC-MS**

## 2 STRUCTURAL INTEGRITY

Tests verify Eagle gloves exceed medical grade AQL requirements, protecting against contamination through pinhole defects, and demonstrate higher strength, durability and resistance to tearing.

▶ **TESTS: AQL, Strength & Elongation**

## 3 CLEANLINESS

Bioburden on both the inside (skin contact) and outside (food & patient contact) of Eagle gloves are tested to ensure against fungal and microbial contaminants that could pose a threat to the glove wearer, and the person or product handled.

▶ **TESTS: MPN Microbial Counts & 16S Metagenomic Sequencing**

## 4 DERMAL COMPATIBILITY

The gloves are tested for a wide variety of chemicals and toxic exposure that could result in dermal or systemic toxicity, ensuring against skin irritation and occupational skin diseases of the wearer.

▶ **TESTS: Mitochondrial Function & Mitotic Index**

### Eagle Glove Traceability

Scan the QR code on the box to track your gloves through our ethical and fully transparent supply chain, including Delta Zero™ testing.

SAFEGUARD WHAT MATTERS™

# GLOVE MATERIAL COMPARISONS

## Nitrile:

1. Nitrile butadiene rubber is synthetic & latex-free
2. Similar to latex in elasticity & strength
3. High chemical resistance & durability

## Vinyl:

1. Eagle no longer supplies vinyl gloves due to their safety risks
1. Made of polyvinyl chloride (PVC)
2. Risks to food safety due to permeability & high failure (rip) rate
3. Environmental risks of production & disposal
4. Adverse health effects from possible phthalates in raw materials

## Latex:

1. High puncture resistance & durability
2. Excellent fit & dexterity
3. Rarely used for food handling due to potential allergic reactions to proteins in gloves
4. Replaced by nitrile in the medical industries

## STRETCHPoly / TPE:

1. Made from a durable stretch polyethylene/ thermoplastic elastomer
2. Improved barrier protection, environmentally superior and cheaper than vinyl gloves
3. Better fit & durability than polyethylene gloves

## Polyethylene:

1. PE gloves are an inexpensive choice for handling food
2. Recommended use of one to two minutes maximum, when frequent glove changes are required
3. Newer & improved variations of PE gloves have enhanced durability & food safety characteristics

# SINGLE-USE GLOVES

## FineTOUGH Nitrile

### FEATURES

- 2.6mil thickness & 9" glove length
- Textured fingertips
- Powder, latex, phthalate & PFAS free
- Available in indigo and white
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- ASTM D6319
- EN ISO 374-1:2016 +A1:2018/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus

Purchase Unit: 1 case of 2,000 Gloves (200/box x 10). Sizes: S - XL.

## Derma<sup>2</sup> Nitrile

### FEATURES

- 3mil thickness & 9" glove length
- Textured fingertips
- Powder, latex, phthalate, PFAS & accelerant free
- Available in blue and black
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- FDA 510(k) cleared for medical use
- ASTM D6319
- ASTM F1671 Viral Penetration
- ASTM D6978 Chemotherapy Drug Tested & tested against Fentanyl & gastric acid
- EN ISO 374-1:2016/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus
- EN 16523-1 Resistance to Chemical Permeation

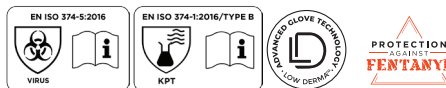

Purchase Unit: 1 case of 2,000 Gloves (200/box x 10). Sizes: S - XL.

## Sensitive Nitrile

### FEATURES

- 4mil thickness & 9" glove length
- Textured fingertips
- Powder, latex, phthalate, PFAS & accelerant free
- Available in blue
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- FDA 510(k) cleared for medical use
- ASTM D6319
- ASTM F1671 Viral Penetration
- ASTM D6978 Chemotherapy Drug Tested & tested against Fentanyl & gastric acid
- EN ISO 374-1:2016/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus
- EN 16523-1 Resistance to Chemical Permeation

Purchase Unit: 1 case of 1,000 Gloves (100/box x 10). Sizes: XS - 2XL.

## Blue52 Nitrile

### FEATURES

- 5mil thickness & 9.5" glove length
- Fully textured
- Powder, latex, phthalate & PFAS free
- Available in blue
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- ASTM D6319
- ASTM D6978 - Tested against Fentanyl
- EN ISO 374-1:2016/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus

Purchase Unit: 1 case of 1,000 Gloves (100/box x 10). Sizes: S - 2XL.

# SINGLE-USE GLOVES

## Visible Nitrile

Visible gloves are formulated for improved strength, durability and tear resistance. They are a highly visible, premium quality glove, for use in all situations when identification and added grip is required.

### FEATURES

- 6mil thickness & 9" glove length
- Fully textured
- Powder, latex, phthalate & PFAS free
- Available in orange, green, black and yellow
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- ASTM D6978 - Tested against fentanyl (**black only**)
- EN ISO 374-1:2016/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus

Purchase Unit: 1 case of 1,000 Gloves (100/box x 10), sizes: S - XL. 1 case of 900 Gloves (90/box x 10), size: 2XL.

## Diamond Textured Nitrile

Diamond textured gloves provide improved grip, especially in wet conditions. They are industrial grade thickness and resistant to a wide range of chemicals, particularly petroleum based.

### FEATURES

- 6mil thickness & 9" glove length
- Fully diamond textured
- Powder, latex, phthalate & PFAS free
- Available in orange, green and black
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- EN ISO 374-1:2016/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus

Purchase Unit: 1 case of 1,000 Gloves (100/box x 10), sizes: S - XL. 1 case of 900 Gloves (90/box x 10), size: 2XL.

## Double Tough Nitrile

Extra thick, strong and durable, manufactured specifically for situations where extra strength and coverage or chemical resistance is required.

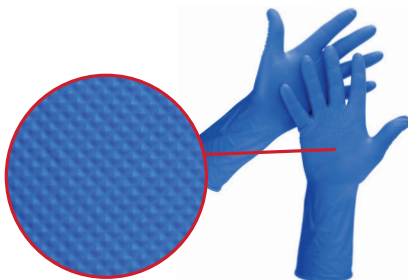

### FEATURES

- 8mil thickness & 12" glove length
- Fully textured
- Powder, latex, phthalate & PFAS free
- Available in blue and green
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- EN ISO 374-1:2016/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus
- EN 16523-1 Resistance to Chemical Permeation
- EN374-2:2014 Resistance to Microbial penetration

Purchase Unit: 1 case of 500 Gloves (50/box x 10). Sizes: M - 3XL.

## Diamond Textured Nitrile

These gloves are extra long cuffed and fully diamond textured, for use in situations when added grip, strength and coverage is required. They are a great ambidextrous alternative to the household rubber glove.

### FEATURES

- 9mil thickness & 12" glove length
- Fully diamond textured
- Powder, latex, phthalate & PFAS free
- Available in blue
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- EN ISO 374-1:2016/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus

Purchase Unit: 1 case of 500 Gloves (50/bag x 10). Sizes: 8 -11.

# SINGLE-USE GLOVES

## Heavy Duty Latex

### FEATURES

- 13mil thickness & 12" glove length
- Fully textured
- Powder, phthalate & PFAS free
- Available in blue
- AQL 1.5 (exceeds Medical Grade requirements)
- FDA (21 CFR 177) compliant for food handling
- FDA 510(k) cleared for medical use
- ASTM F1671 Viral Penetration
- ASTM D6978 Chemotherapy Drug Tested
- EN ISO 374-1:2016/Type B
- EN ISO 374-5:2016 Resistance to Bacteria, Fungi and Virus
- EN 16523-1 Resistance to Chemical Permeation
- NFPA 1999 certified

Purchase Unit: 1 case of 500 Gloves (50/box x 10). Sizes: S - 2XL.

## STRETCHPoly

### FEATURES

- 1.7g glove weight & 10" glove length
- Powder, latex, phthalate & PFAS free
- Available in clear and blue
- AQL 2.5
- 100% recyclable
- FDA (21 CFR 177) compliant for food handling

Purchase Unit: 1 case of 2,000 Gloves (200/box x 10). Sizes: S - XL.

## TPE Embossed

### FEATURES

- 2.0g glove weight & 10" glove length
- Powder, latex, phthalate & PFAS free
- Available in clear
- AQL 4.0
- 100% recyclable
- FDA (21 CFR 177) compliant for food handling

Purchase Unit: 1 case of 2,000 Gloves (200/box x 10). Sizes: S - XL.

## Nitrile Coated Cotton Shuckers

### FEATURES

- 9.8" glove length
- Fully coated cotton-lined glove
- PFAS free
- 3x dipped for extra strength and cut resistance
- Right and left gloves sold separately
- Available in blue

Purchase Unit: 1 case of 120 Gloves (12/bag x 10). Sizes: 9 - 10.

# SINGLE-USE PROTECTIVE CLOTHING

## Smocks

Smocks offer both front and rear protection against spills and contamination.

### FEATURES

- Extra tensile strength virgin plastic (Low Density Polyethylene (LDPE))
- Supplied on a hard header block (see image) to reduce waste and for easy dispensing
- 100% recyclable
- Size: 51 x 28"
- 30µm / 1.18mil
- Available in white, blue and red

Purchase Unit: 1 case of 200 Smocks (50/header x 4)

## Sleeved Smocks

Disposable Sleeved Smocks are a custom design driven by the demands of the world's leading New Zealand Meat Industry. They offer a comprehensive level of protection against spills and contamination.

### FEATURES

- Extra tensile strength virgin plastic (Low Density Polyethylene (LDPE))
- Provides warmth with the full shoulder and 3/4 sleeve length
- Supplied on a soft header block (see image) to reduce waste and for easy dispensing
- 100% recyclable
- Size: 51 x 31"
- 30µm / 1.18mil
- Available in white and blue

Purchase Unit: 1 case of 200 Sleeved Smocks (50/header x 4)

## Aprons

A cost effective option for protection against spills and contamination.

### FEATURES

- Extra tensile strength virgin plastic (LDPE)
- Built in ties to allow desired fit
- Supplied on a soft header block (see image) to reduce waste and for easy dispensing
- 100% recyclable
- Size: 47 x 24" (22µm/ 0.87mil)
- Available in white

Purchase Unit: 1 case of 500 Aprons (100/header x 5)

## General Purpose Thumbloop Gowns

Waterproof protection against spills and contamination. The full length sleeves with thumbloop cuffs ensure arm and wrist coverage and containment. The built-in waist ties allow for a desired fit.

### FEATURES

- Waterproof protection
- Over-the-head neck style
- Thumbloop cuffs
- Built-in waist ties for a desired fit
- Made of CPE (Chlorinated Polyethylene)
- Size: 45 x 41"
- 52g
- Available in blue

Purchase Unit: 1 case of 200 Gowns (25/bag x 8)

# SINGLE-USE PROTECTIVE CLOTHING

## Long Sleeve Smocks with Thumbloops

A custom design specifically for the food processing industry. They offer a comprehensive level of front and rear protection against spills and contamination. Full-length sleeved thumbloop cuffs, ensure arm and wrist coverage and containment.

### FEATURES

- Full-length sleeved thumbloop cuffs
- Extra tensile strength virgin plastic (LDPE)
- Supplied on a hard header block (see image) to reduce waste and for easy dispensing
- 100% recyclable
- Size: 51 x 31"
- 25µm / 0.98mil
- Available in blue

Purchase Unit: 1 case of 200 Smocks (50/header x 4)

## Jackets with Hood

Disposable Jackets have full length elasticated sleeves and hoods for excellent protection against spills and contamination.

### FEATURES

- Extra tensile strength virgin plastic (LDPE)
- LDPE is flexible and comfortable
- Elasticated full-length sleeves
- Size: 51 x 31"
- 27µm / 1.06mil
- Available in white and blue

Purchase Unit: 1 case of 200 Jackets (20 individually wrapped/bag x 10)

## Sleeve Protectors

Sleeve protectors provide arm protection for numerous applications and industries.

### FEATURES

- Extra tensile strength virgin plastic (LDPE)
- Elasticated for a firm fit
- 18" long
- 3.5g weight
- 20µm / 0.78mil
- One size fits most
- Available in white and blue

Purchase Unit: 1 case of 1,000 Sleeves (10/roll x 10 rolls/bag x 10)

## Visitor Kits

Visitor Kits are an individually packed, total clothing protection kit for guests. An easy option to give your visitors to wear when on site.

### FEATURES

- Individually packed, total protection kit
- Includes disposable hat, full sleeve top, pants and oversocks
- Made from a comfortable non-woven material
- One size fits most
- Available in white and blue

Purchase Unit: 1 case of 50 Kits (1 kit/roll x 50)

# SINGLE-USE PROTECTIVE CLOTHING

## Clip Hats

Clip Hats are designed for complete hair coverage across multiple industries.

### FEATURES

- Lightweight, breathable non-woven material
- Elasticated for a firm fit
- One size fits most - 21"
- Designed for easy dispensing
- Double stitched for increased durability
- Available in white

Purchase Unit: 1 case of 1,000 Hats (100/bag x 10)

## Bouffant Hats

Bouffant Hats are designed for maximum volume hair coverage across multiple industries.

### FEATURES

- Lightweight, breathable non-woven material
- Elasticated for a firm fit
- Available in 24" (blue) & 28" (white)

Purchase Unit: 1 case of 1,000 Hats (100/bag x 10)

## Beard Covers

Single-loop Beard Covers are made from non-woven material for a soft, comfortable fit. Designed for optimal facial hair containment.

### FEATURES

- Lightweight, breathable non-woven material
- One size fits most
- Available in white and blue

Purchase Unit: 1 case of 1,000 Beard Covers (100/bag x 10)

## Disposable Balaclavas

Disposable Balaclavas are designed to provide full head cover for warmth, complete containment & cleanliness.

### FEATURES

- Lightweight, breathable non-woven material
- Single-use
- One size fits most
- Available in white

Purchase Unit: 1 case of 500 Balaclavas (100/bag x 5)

## Reusable Balaclavas

Washable Balaclavas provide full head cover for warmth, containment and cleanliness.

### FEATURES

- Warm, comfortable and breathable balaclava
- Polyester material
- Washable
- Closed face style
- One size fits most
- Available in white

Purchase Unit: 1 case of 500 Balaclavas (50/bag x 10)

# THE EAGLE STANDARD

We provide our customers solutions by delivering consistent high-quality products, manufactured sustainably and ethically.

## Factory Visits

Eagle staff visit our factories to ensure product manufacturing quality and performance, and ethical sourcing including factory staff conditions and environmental impact.

## Benefits to You

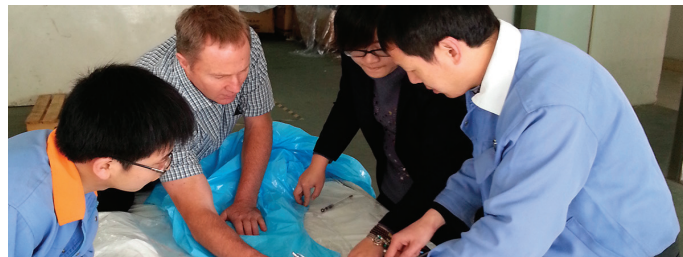

**Reduced frustration:** You receive consistent quality Eagle products sourced from reputable suppliers. The same high-quality product, every time.

## Supplier Code of Conduct & Independent Audits

The Eagle Supplier Code of Conduct remains a core requirement of our supply chain partnerships, in addition to Sedex membership & independent third-party auditing of our factories. A core range of our gloves are manufactured in WRAP certified facilities (Gold level).

## Benefits to You

**Brand Protection:** Proof of ethical sourcing, respect for labor rights and quality control measures to safeguard your brand reputation.

## Single-Source Model

Sourcing each Eagle product from a single supplier guarantees consistent premium product quality and supply.

## Benefits to You

**Peace of Mind:** Consistent, audited manufacturing standards ensure you receive the same glove performance and quality with each order.

## Supply Chain Traceability

Partnering with FDA award-winning platform Assure+, Eagle is revolutionizing the glove industry by capturing, securing and sharing supply chain activity including shipping, product and testing documentation.

## Benefits to You

**Ease of Documentation:** Easily access product and testing documents needed for specifications or certification. Eagle's traceability safeguards your business from extreme safety issues such as counterfeit gloves and glove factory labor exploitation.

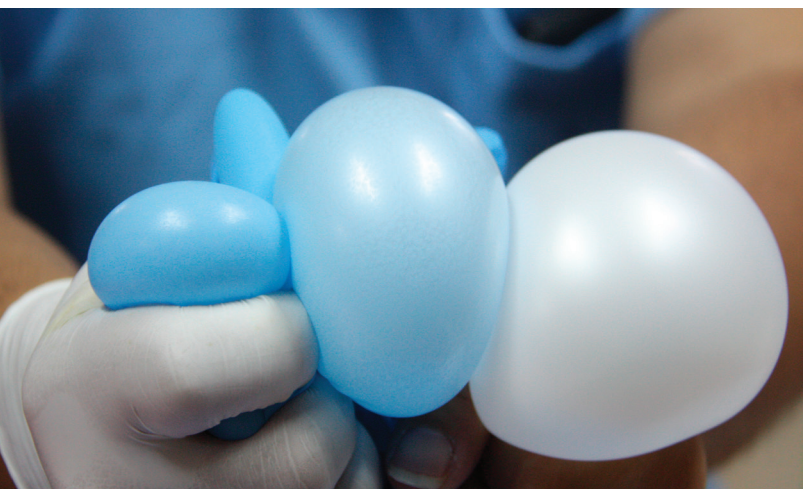

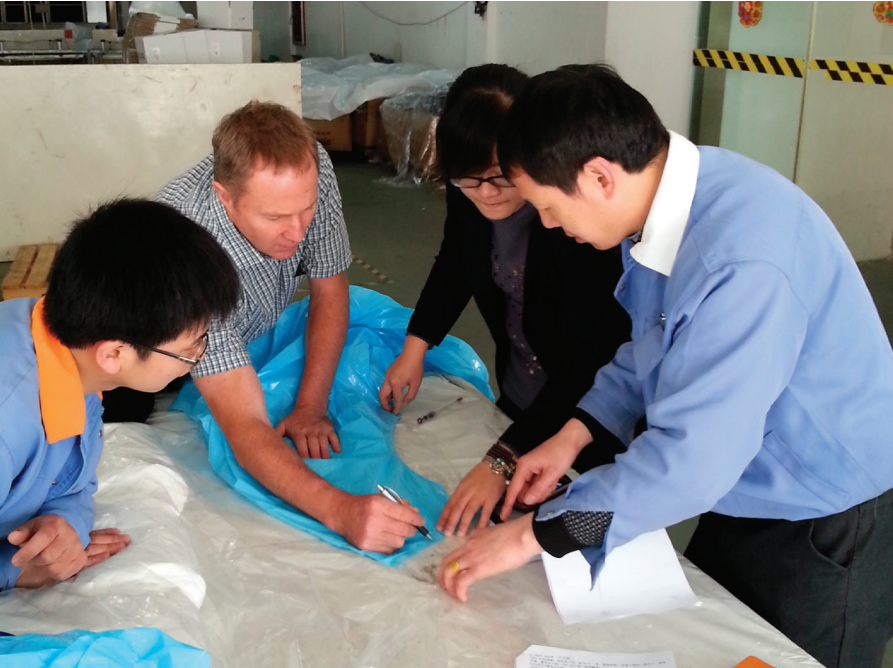

## Delta Zero™

Third-party laboratory testing ensures the consistent safety and performance of Eagle gloves' raw materials and the absence of unsafe chemicals, toxins and microbial contaminants.

## Benefits to You

**Mitigate Glove Risk:** Confidence in the consistent superior quality and performance of Eagle's gloves mitigates the risks of glove contamination and protects the health of your staff and/or patients.

2024

# PRODUCT CATALOG

Eagle's single-use consumables offer physical & reputational protection for our busy, dirty . Our products may be disposable and number in the multi-millions

but every single 1 needs to perform PERFECTLY in a high-risk environment. To meet these rigorous demands and ensure constant improvement, we visit and review all our international  suppliers every year.

In your complex , we work hard to MASTER THE 'ART OF EASY'!

Mediocrity is not our style. CURIOSITY is. We believe in honest dealings,  fair pricing and assisting everyone connected to our business to prosper.
