<b>IPSS Data Collection*</b>	Physician must submit de-identified IPSS data from a minimum of 30 UroLift System treated patients including: 1. Pre- and post-procedure IPSS data demonstrating mean improvement $\geq 40\%$ compared to baseline average (Please see submission requirements below) 2. Date of each pre- and post-procedure assessment 3. Indicate the use of BPH medication at the time of pre- and post-procedure IPSS assessments

\* Within 15 months prior to submission for designation. + Cases cannot include a physician's initial 15 training cases.

In the interest of continuous improvement, we reserve the right to analyze the data and make modifications if deemed appropriate.

## Requirements for Physicians Re-Designating for the Year 2022:

With the Physician Gateway launching in 2022 and per our COVID accommodation we have updated COE re-designation requirements as follows:

During the months of January through March 2022, Teleflex will be undergoing a beta launch of our new UroLift Physician Gateway. Those physicians designated between January 1st and March 30th 2021, per our 15 month COVID accommodation, are required to re-designate by May 2022. Physicians designated between April 1st and December 31st 2021, per our COVID accommodation, must complete their re-designation within 15 months of their original designation date. For example: If a physician was designated in April 2021, they will need to re-designate by June 2022.

If the physician does not meet the COE re-designation requirements, their COE insignia will be suspended from the Physician Locator. Physicians must meet the program requirements applicable at the time of submission. Accommodations relating to the COVID-19 Pandemic are subject to change following the December 31, 2021 submission deadline, and may not be available if a physician submits their information after that date. Upon receipt of the required information, the physician's submission will undergo the standard review process for re-designation.

# Center of Excellence Program REQUIREMENTS *cont.*

## Physician Education Details:

Physician education events will be led by the Clinical and Medical Affairs (CMA) division within Teleflex Incorporated. CMA is focused on providing medical education to support the safe and effective use of Teleflex products in patients.

### Qualifying Physician Education Events:

- Preceptorships
- Proctorships (CMA or faculty-led)
- BPH Summits
- Webinars run by CMA personnel
- Teleflex CMA staff-led seminars
- UroLift® University Modules\*:
  - Obstructive Median Lobe Technique
  - Preventing and Managing Complications: Bleeding
  - Preventing and Managing Complications: Retention, Incontinence, Retreatment
  - Patient Consult
  - Clinical Data Video – LIFT 4 Year
  - Median Lobe Webinar
  - BPH and Bladder Health
  - Integrating UroLift System Faculty Panel: IPSS Usage
  - Integrating UroLift System: Practice Efficiencies
  - Procedure Video Case Reviews – Gregg Eure, MD
  - Anesthesia Protocols
  - BPH Care Pathway

Approved physician education events and modules are subject to change as new information is released. Events can occur virtually or in-person.

*\* Physicians must be logged into their individual UroLift University account for the modules to be counted as complete.*
