

# SMSF

## Australia's first cloud-based SMSF administration solution

What we do best is to give you the gift of time so you have freedom to choose exactly which elements of the SMSF administration you get to work on, and which to pass on to your administrator and advisers - with the added confidence of knowing your client relationships stay protected throughout.

“

We started using Class for the 2015/16-year accounting for approximately 250 funds, having switched from a desktop product. Not only have we noticed greater efficiencies with the automation in completing these funds, but we have also reduced the number of people working on these funds from five to two people.

”

Natalie Anderson, Skerrit Superannuation
