**Printware Launches  
Newest Version of the iJetColor™ Pro Series  
The iJetColor Pro 1175P Incorporating  
The HP® FI-1000 Printhead  
at PRINTING United Insight Days 2020**

***New iJetColor Pro 1175P high-speed envelope solution is PRINTING United Alliance 2020 Product of the Year in the Digital Press Category.***

**ST. PAUL, MINNESTOA – October 26, 2020** – Printware, a print industry leader in prepress and digital solutions, unveils the iJetColor Pro 1175P at PRINTING United’s virtual tradeshow, Insight Days from October 26<sup>th</sup> thru November 12<sup>th</sup> 2020. The iJetColor Pro 1175P is Printware’s first collaboration with HP and is the newest version of the iJetColor Pro series and newest member of the iJetColor family of envelope presses. It incorporates HP’s FI-1000 printhead to deliver PageWide thermal inkjet technology that is faster, wider, more durable, and more economical. The iJetColor Pro 1175P received the 2020 Product of the Year from PRINTING United Alliance in the digital press category.

The iJetColor Pro 1175P is designed with high-volume print, packaging, and direct mailing operations in mind, to give them the versatility of a wider print width, durability with pigment based ink, and high-speed production utilizing the HP FI-1000 printhead, all at 33% lower variable costs over other inkjet solutions.

The iJetColor Pro 1175P incorporates the HP FI-1000 printhead to deliver wider print width of 11.7” to print full-bleed in both landscape and portrait orientation on #10 envelopes. In addition, it allows printing on a wide variety of media and sizes – up to 2” thick. The HP FI-1000 printhead generates full-color images using pigment-based durable ink that is fade, scratch, and water-resistant with rich black,

optical density like offset inks. The printhead itself is durable, with a long lifespan yielding millions of images.

The iJetColor Pro 1175P, which features our robust feeder, alignment table, and proprietary vacuum conveyor, is **fast** - it can print up to 10,000 #10 envelopes per hour at press-like speeds of 18 ips.

“The iJetColor family of products is the result of our commitment to our customers to constantly meet the most demanding inkjet print applications that need to produce not only the highest quality full-color in very high-volume applications but also to ensure the lowest total cost of ownership” commented Tim Murphy, President of Printware. “Since our first shipments began in 2013, our customers count on enhancements that increase their productivity and profitability. Today, with this product launch, our customers have a complete line of inkjet solutions that best meet their short-run personalization needs while generating maximum profits.”

Designed for high-volume print and mailing operations, the iJetColor, iJetColorNXT, iJetColorPro, and iJetColor Pro 1175P optimize print speeds with unrivaled productivity and provide low variable costs per piece compared to all toner solutions in the marketplace. The entire iJetColor family is available for commercial shipments in October of 2020.

All iJetColor systems come with brand color management tools, including an industry-leading ColorBoost technology to optimize color brightness at higher production speeds and specialized workflow developed by Xitron, that are married to a comprehensive industrial operator touchscreen and full training, support, and supplies from Printware, a leading equipment provider to the industry for over 30 years. The Brand Color Editing feature allows brand colors, PMS colors or Spot colors to be specifically defined for CMYK reproduction. In addition, speed improvements have been made for variable data and addressing. Integrated workflows also drive optional Indicia and Mailing Permit imprinting that provides ultra-high-speed imprinting applications.

iJetColor Press systems are offered with a comprehensive package including the Advanced Inkjet Expert Training Program, professional installation, 24/7 support, and a “no finger pointing” quality guarantee. We always supply input and output handling as part of our solution, including product tables.

Printware was awarded “MUST SEE ‘EM” Best in Category during Print ‘17 for the iJetColorPro, the iJetColor in Print ‘13 and a “Game Changer” at Graphics of the Americas 2014 for its iJetColor™ Envelope Press and Workflow.

### **Power-of-Zero™ Financing Program – the No-Click Advantage!**

Also available is our finance program offered exclusively for any iJetColor products without the hassles of a loan, lease, clicks, high interest payments, down payments or fees. As the only manufacturer that offers a comprehensive financing program that offers:

- ◆ 0 Clicks, 0 Interest, 0 Down Payment (nominal application fee)
- ◆ 0 Problems –monthly payment includes our over-the-top support program.
- ◆ 0 Buyout – nominal FMV buyout or Printware guarantee we will buy it back.

### **Lowest Total Cost of Ownership – *the Inkjet Advantage.***

The iJetColor Press family of products takes advantage of Printware's complete service and supply plans, providing customers the lowest total cost of ownership of any comparable solution in the market. All iJetColor Press systems come with a Profit Predictor™ that details exact variable costs for print personalization to ensure proven financial results. With thousands of installations, from small to large volumes, iJetColor printers provide very fast return on investment, usually less than 1 year.

### **Advanced Inkjet Expert Training Program backed by 24/7 Support**

The Advanced Inkjet Expert training program backed by 24/7 Support offers a no-risk service program to allow customers to maintain high uptime. Utilizing Remote Diagnostics, 100% complete system coverage, 24/7 telephone support, Online Training Tools, and optional On-Site technical support, customers have the options and flexibility they need to stay in production.

### **Secure Supply and our iJetAdvantage™**

The Printware iJetAdvantage™ eliminates the need for customers to worry about running out of supplies or changes in delivery of low-cost high-performance inkjet consumables. iJetColor inks are available in both single color and combo packages. Printware offers an industry-exclusive **Printhead Life Guarantee** – with extensive experience in high-volume operations, customers can be sure of low variable costs that they can count on. Other user-replaceable consumables and parts are also offered in a spares kit for users to have on hand when needed to allow for maximum uptime performance.

Printware products are available directly from Printware. For more information visit [www.ijetcolor.com](http://www.ijetcolor.com), call 800-456-1400, or email [sales@ijetcolor.com](mailto:sales@ijetcolor.com).

### **About Printware**

Printware designs, engineers, and markets the iJetColor™ Pro, iJetColorNXT™, and the iJetColor™ envelope printing systems, all are highperformance, low-cost inkjet digital printers powered by Memjet technology. The iJetColor Press is offered in a number of bundled configurations that include the iJetColor workflow powered by industry-leading Harlequin RIP technology. Printware also manufactures the world's most highly used polyester computer-to-plate systems that produce cut-to-size, punched, and press-ready printing plates. Printware offers its customers complete equipment service, technical support, and a full line of consumables under its iJetColor and SilverStream® brands. Printware, LLC is a member of the Vanguard Graphics International group of companies.
