To Whom It May Concern:

Xybix Workstation Project for Will County 9-1-1 Emergency Telephone System

Will County 9-1-1 Emergency Telephone System had been using Xybix Systems furniture in our six 9-1-1 centers since 2006. We are very pleased with the quality of the workstations along with the installation and service your company has provided over the past 11 years. After sales support has been great and the customer service department is always willing to help with every issue we have. Our most recent project was to build a new sixteen position 9-1-1 center. During the process everyone from sales, design and installation were extremely professional and very knowledgeable on your product. At installation Tim was very polite, professional, and accommodating. The installation was completed on time without any problems.

In 2018, we will start to upgrade our older furniture, not because of failures or that they are wearing out, but only to bring some of the new and exciting designs that you have incorporated into the current furniture.

It is a pleasure doing business with your company and look forward to another 11 years.

Sincerely,

Dale E Murray
